## INTRODUCTION

introduction and overview .....	1
workshop schedule .....	2-3
the nursery @ CMFC .....	36-37

## FRUIT PLANTS

almonds .....	12
apples .....	4-5
apricots .....	8
asparagus .....	16
blackberries .....	11
blueberries .....	10
cherries .....	8-9
chokeberries .....	16
currants .....	10
elderberries .....	16
figs .....	16
goji berries .....	17
gooseberries .....	23
grapes .....	14-15

hazelnuts .....	12
honeyberries .....	16
kiwis .....	13
mulberries .....	17
olives .....	17
peaches .....	8
pears, asian .....	6
pears, european .....	6
pears, hybrid .....	7
persimmons .....	17
plums .....	7
quince .....	17
raspberries .....	12
rhubarb .....	17
seaberries .....	17
strawberries .....	11
tea .....	17
walnuts .....	12
yuzu ichandrin citrus .....	17

## ORNAMENTAL PLANTS

flowering garden trees .....	18-19
garden trees for foliage & form .....	19-20
japanese maples .....	20-22
broadleaf evergreen shrubs .....	23-25
conifers .....	26-28
climbing vines .....	28
perennials & herbs .....	29-31
deciduous shrubs .....	31-33
rhododendrons .....	34-35

As we head into 2021, we want to take a moment and thank everyone who supported us through the difficult year 2020 presented. Our shutdown decision in March due to COVID-19 wasn't easy to make. We have some vulnerable staff members and a very small sales room. We also recognized the advantage we had already having a robust online platform. Thanks to all who suffered through any glitches in our system—your patience while we worked out the problems was much appreciated. The shutdown also allowed us to FINALLY complete the long-overdue remodel of our sales yard.

We will have in-person shopping again in 2021 with safety measures in place. We will also continue to offer curbside pickup for those not comfortable with in-person browsing. We are excited about the changes in the sales yard—our new retail greenhouse will allow dry shopping even during rainy spells. And as the year goes on, check out the innovative irrigation systems we've designed to save water.

## cloud mountain farm center online!

If you haven't visited our website, you should! All fruit and ornamental plants, tools, amendments, seeds, and seasonal produce are all online and available for ordering. [www.cloudmountainfarmcenter.org](http://www.cloudmountainfarmcenter.org).

You can check availability and securely place orders 24 hours a day, 7 days a week.

## growing information

Our mission includes education — we have a wealth of informational handouts and interactive pages on growing fruit and ornamental plants available at our website and at the Center. If you're looking for information on pruning apples or information on disease management, there's a page for that.

## gift cards

Cloud Mountain gift cards make a great gift for the garden enthusiast in your life! Available for purchase online or by phone. Gift cards are redeemable online or at the Center.

## shipping plants

We ship via USPS Priority Mail from February 15 through mid-to-late April, weather permitting. We will only ship when we feel confident that the plants will arrive in good condition. Some plants have very restricted shipping seasons for that reason. When we confirm your order, we will try to specify the ship date that we feel is best. **We do not cold store plants.** If you are in the Midwest, on the East Coast, or in Alaska, we may not be able to ship you dormant plants during your prime planting season. We ship to all states within the U.S., limited by weather and each state's agricultural restrictions. At this time, we do not ship to other countries.

Viburnum carlesii Aurora -  
Spice Viburnum

Amelanchier x grandiflora - Autumn  
Brilliance Serviceberry

Thuja plicata -  
Zebrina Western Red Cedar

## plants for attracting pollinators

provide a food source for pollinating insects year-round

### DECEMBER - FEBRUARY

- Viburnum b. 'Dawn' - fragrant winter viburnum
- Corylus sp. - hazelnut
- Mahonia intermedia - hybrid mahonia
- Helleborus niger, hybridus - hellebore, lenten rose
- Alnus rubra - red alder
- Salix sp. - pussy willow
- Arcto staphylos sp. - manzanita
- Erica x darlyensis - winter heather
- Crocus species & hybrids - crocus

### MARCH - MAY

- Ribes sanguinum - red flowering currant
- Acer species - maples
- Mahonia aquifolium - oregon grape
- Sambucus sp. - elderberry
- Rosemarinus officianalus - rosemary
- Vaccinium species - blueberry, huckleberry, cranberry
- Amelanchier species - serviceberry
- Rubus species - blackberry, raspberry

### MAY - AUGUST

- Arbutus menzesii - madrone
- Symphoricarpos albus - snowberry
- Herbs - lavender, thyme, oregano, mint
- Agastache - hyssop
- Penstemon species - penstemon, beardtongue
- Salvia species - sage
- Calluna vulgaris - scotch heath
- Achillia millifolium - yarrow

### SEPTEMBER - NOVEMBER

- Aster species - aster
- Sedum - stonecrop
- Grevellia victorae - silk oak
- Heptacodium micanoides - seven son tree

## plants for winter wet soils

tolerant of heavy soils and high water tables

### TREES

- Acer rubrum - red maples
- Betula sp. - birch
- Metasequoia glyptostroboides - dawn redwood
- Nyssa sylvatica - blackgum or tupelo
- Salix sp. - willows
- Chamaecyparis nootkatensis - Alaskan cedar
- Pinus contorta & sylvestris - two-needled pines

### SHRUBS

- Amelanchier sp. - serviceberry
- Aronia sp. - chokeberry
- Cornus sericea or stolonifera - dogwoods
- Gaultheria shallon - salal
- Hydrangea sp. - hydrangeas
- Sambucus sp. - elderberries
- Physocarpus sp. - ninebark
- Viburnum sp. - viburnum (deciduous species)

### FRUIT PLANTS

- Mountain ash hybrids (Shipova)
- Pears (both European and Asian pears)
- Filberts (hazelnuts)
- Blueberries (some varieties)
- Lingonberry and cranberry
- Black currant

## good plants for hedges

evergreen plants tolerant of shearing for size control

### CONIFERS

- Cryptomeria japonica - Japanese cedars
- Thuja plicata - western red cedar
- Tsuga sp - hemlocks

### BROADLEAFED EVERGREENS

- Arbutus unedo- strawberry tree
- Choisya - Mexican mock orange
- Ilex crenata - Japanese holly
- Mahonia aquifolium - Oregon grape
- Myrica californica - pacific wax myrtle
- Osmanthus sp. - fragrant or holly-leaved osmanthus
- Pittosporum heterophylla - Chinese pittosporum
- Prunus lusitancia - Portugal laurel
- Rhododendron - rhododendron

### OTHER

- Fargisia sp. - clumping bamboo
- Phyllostachus sp. - running bamboo

Sales Yard at Cloud Mountain Farm

# WORKSHOP SCHEDULE

## 2021 community learning at cloud mountain farm center

Workshops in 2021 will be limited and with safety measures in place. Basic workshops will be limited to 10 participants, and Advanced workshops limited to 8 participants. All participants will be required to wear a face covering, and all workshops will be held outside, so be prepared for the weather. **Pre-registration is required this year for all workshops.**

Basic workshops are \$15 per person. Our advanced classes are more in-depth and hands-on, and are \$50 per course. Please register for classes on our website or by phone at (360) 966-5859 x 3.

CLASS	DATE & TIME	NOTES
<p><b>Learn to Grow Fruit Trees</b> Thinking about planting fruit trees, but don't know where to start? This is the place! You'll learn about the easiest varieties to grow, how to decide which rootstock to plant, where and how to plant, and what initial pruning and training are needed. You'll leave knowing how to give your trees the best start in the first 3 years.</p>	<p><b>2/13 - 10:30am to 12:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>
<p><b>Growing Apples &amp; Pears</b> Want to know more about growing apples and pears? This class will cover growing techniques and pruning methods for apple and pear trees. The techniques covered will help you to keep your trees healthy and productive year after year.</p>	<p><b>2/20 - 10:30am to 12:30pm</b> <b>3/6 - 1:30pm to 3:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>
<p><b>Advanced Apple &amp; Pear Growing (Two-part hands-on course)</b> <b>Part 1 :</b> This two-part class will take you beyond basics to enhance your skills as a fruit grower. In the first class, you'll be working in the orchards pruning established trees, with hands-on instruction. You'll practice applying pruning theory to trees grown on different training systems, and on trees of different ages. Expect to walk away feeling more confident when working with your fruit trees. <b>Part 2 :</b> In the second class in this two-part series you'll learn about the process of scouting for pest and disease issues, and about how pruning in Part 1 has affected the early growth of the trees. You'll also learn about fruit set and participate in a hands-on thinning practicum.</p>	<p><b>SESSION A</b> <b>Part 1: 2/20 - 1:30pm to 3:30pm</b> <b>Part 2: 6/12 - 1:30pm to 3:30pm</b> <b>SESSION B</b> <b>Part 1: 2/27 - 10:30am to 12:30pm</b> <b>Part 2: 6/26 - 10:30am to 12:30pm</b></p>	<p>Limited to 8 per class, face coverings required, pre-registration required</p>
<p><b>Growing Small Fruits</b> Did you know that Northwest gardeners can grow an incredible variety of fruits and berries? This workshop will focus on techniques for growing small fruiting plants like blueberries, raspberries, blackberries, strawberries, and kiwis.</p>	<p><b>2/27 - 1:30pm to 3:30pm</b> <b>3/13 - 10:30am to 12:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>
<p><b>Learn to Grow Organic Fruit at Home</b> You can grow tree fruits and berries using organic practices, even in our challenging climate. Learn how to keep your trees and berry plants healthy and productive. This workshop will cover the most common pest and disease issues in our area, and how to deal with them effectively. Other topics will include soil and weed management, and use of compost and mulches in fruit growing.</p>	<p><b>3/6 - 10:30am to 12:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>
<p><b>Growing Table Grapes</b> Join us for this workshop and learn how to grow table grapes successfully here in the Northwest. You'll learn about trellis design, pruning and training, and about fertility and pest management methods. We'll also discuss varieties that work in our cool summer climate.</p>	<p><b>3/20 - 10:30am to 12:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>

<p><b>Growing Wine Grapes</b>                  This workshop will provide you with an overview of how to grow wine grapes in our cool climate. You will learn about cultural practices including soil requirements, pruning techniques, pest management, and harvesting. The workshop will take place in the vineyard.</p>	<p><b>3/20 - 1:30pm to 3:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>
<p><b>Growing a Fruiting Wall: Espalier and Beyond</b>                  Fruiting Walls and Espalier training systems use a trellis system, and typically produce more fruit per square foot than conventionally trained fruit trees. We will cover various unique training systems for fruit trees that allow growers to maximize limited space while adding aesthetics to the garden. These training systems also make it easy to utilize disease-resistant varieties and insect nets that will allow for clean fruit at harvest. We will discuss apples, pears, cherries, plums, and peaches. The class will cover construction considerations, training, and which plants will succeed.</p>	<p><b>3/27 - 10:30am to 12:30pm</b>  <b>4/10 - 1:30pm to 3:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>
<p><b>Growing Stone Fruits: Cherries, Peaches, Apricots &amp; Plums</b>                  Growing cherries, plums, peaches, and apricots can be both rewarding and challenging in our maritime climate. This workshop covers planting, growing techniques, and pruning of stone fruits.</p>	<p><b>3/27 - 1:30pm to 3:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>
<p><b>Advanced Stone Fruit Growing (Two-part hands-on course)</b>  <b>Part 1 :</b> Do you still hesitate before you make a pruning cut on your plum or cherry trees? This two-part class will take you beyond theory to enhance your skills. In this first class, you'll be working in the orchards pruning established trees, with hands-on instruction. You'll practice pruning trees of different ages. Stone fruits require special handling when pruning, and are pruned just as the fruit sets. To provide hands-on training, we limit the class size.  <b>Part 2 :</b> In the second class in this two-part series you'll learn about the process of scouting for pest and disease issues, and about how pruning in Part 1 has affected the early growth of the trees. You'll also learn about fruit set, and participate in a hands-on thinning practicum.</p>	<p><b>Part 1: 4/10 - 10:30am to 12:30pm</b>  <b>Part 2: 6/12 - 10:30am to 12:30pm</b></p>	<p>Limited to 8 per class, face coverings required, pre-registration required</p>
<p><b>Summer Care in the Vineyard</b>                  This workshop walks you through best practices for managing your vineyard in the hot summer months. The class will cover shoot positioning, summer pruning, bunch thinning, water management, and disease management. All of these techniques are critical to the production of quality grapes for eating and winemaking.</p>	<p><b>6/26 - 1:30pm to 3:30pm</b></p>	<p>Limited to 10 per class, face coverings required, pre-registration required</p>

Advanced Apple & Pear Growing

Summer Care in the Vineyard

# FRUIT PLANTS

Elstar Apple

## apples \$29.95

### varieties listed in order of ripening

- Zones 5-9
- Great varieties selected especially for Northwest gardens
- All varieties need a pollinizer
- 🍷 Triploid varieties do not pollinize other varieties
- Easiest to grow are **S** scab-resistant and **B** mildew-resistant
- Look for **F** for eating apples that are also good for hard cider

**WILLIAMS PRIDE** This selection is top quality for early apple season. The fruit is bright red with full-bodied flavor, rare for early selections. Trees have good vigor and are heavy producers. Immune to scab and somewhat resistant to mildew. Early season bloom. **Ripens early to mid-August.** Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 **S**

**GRAVENSTEIN** (Sheets Green strain) Very popular. Hard, coarse-textured flesh, excellent eating and superb sauce apple. Earliest bloom. **Ripens late August to early September.** Will not pollinize other varieties. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf 🍷 **F**

**AKANE** Bright red apple has juicy, white flesh with wonderful grape-like flavor, superb eaten fresh or for baking. Hangs well on tree, very resistant to scab. Better keeper than most early fall varieties. **Ripens early September.** Early to midseason bloom. Thin well for good size. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf **S** **B**

**RED ALKMENE** Very good quality eating and multi-purpose apple. Crisp and juicy with an intense, distinctive sweet-tart flavor. Skin is bright red over yellow background. The tree is compact and productive. Does not keep well. Hangs well on the tree; excellent home orchard apple. Early season bloom. **Ripens early September.** Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf **S** **F**

**ZESTAR!** Release from the University of Minnesota. Sweet with a bit of zing, crisp and juicy. Good storage potential for such an early apple. Early bloom. **Ripens early September.** Rootstocks: M-26 dwarf, M-106 semi-dwarf

**INITIAL@** A mid- to late September ripening apple with very crisp texture, high sugar and low acid fruit. Cross of Gala and Redfree. Scab immune. Will not pollinize other varieties. Developed in France. Propagation protected variety. Rootstock: G-41 mini-dwarf (pick up only) 🍷 **B** **S**

**TSUGARU** This mid-September ripening apple has a juicy, sweet caramel flavor, somewhat like the popular Fuji but richer. An annual favorite at our fall tasting. Midseason bloom. Rootstocks: G-41 mini-dwarf M-26 dwarf, M-106 semi-dwarf

**QUEEN COX** Cox are known for their world-class flavor. This improved Cox selection produces well

in cool summer areas. Stores one month. Medium sized, bi-colored apple. Blooms midseason. **Ripens in mid to late September.** Rootstocks: M-26 dwarf **F**

**HONEYCRISP** Eating quality as the name suggests: very sweet flavor with a distinctive crunch. Trees are very productive. Large, well-formed fruits, 50–90% red stripe, and a favorite at our Fall Fruit Festival. Midseason bloom. **Ripens mid- to late September.** Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf **S**

**FIESTA** Cox's Orange Pippin x Idared. Easier to grow than many Cox types, this is a productive, disease-resistant cultivar with tangy, aromatic sweet flavor. Stores up to 6 weeks. Mid- to late-season bloom. **Ripens late September.** Rootstocks: M-27 mini-dwarf, M-26 dwarf, M-106 semi-dwarf (pick up only) **S**

**LIBERTY** Beautiful long conical bright red fruits with a sprightly tart flavor, hard-breaking flesh and thin skin. Fruit will store throughout the fall, best eaten within the first month. Trees produce heavy crops. Must be thinned to achieve fruit size. Blooms early midseason. **Ripens late September.** Will not pollinize other varieties. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf 🍷 **S** **B** **F**

**ELSTAR** Scab resistant, vigorous tree that branches profusely. Fruit quality is excellent, crisp and juicy, with intense aromatic sweet-tart flavors. Fruit size is medium. Pick slightly green to store. Will store to December if refrigerated. Midseason bloom. **Ripens late September.** Rootstocks: G-41 mini-dwarf, M-106 semi-dwarf **S** **F**

**FREEDOM** Fruit is crisp with intense sweet, tangy flavor. Very productive and vigorous. Scab immune. Keeps 4–5 weeks under good storage conditions. Late midseason bloom. **Ripens late September.** Rootstocks: G-41 mini-dwarf, M-106 semi-dwarf **S** **B** **F**

**NORTH POLE COLUMNAR APPLE** A deep red, McIntosh-type apple. Like other columnar apples, it will grow to 8'–10' tall, but stay only 3' wide. Midseason bloom. **Ripens late September.** Rootstock: M-106 semi-dwarf

**SCARLET SENTINEL COLUMNAR APPLE** Large yellow fruit with a deep red blush. Crisp and sweet with pure white flesh. Moderate disease resistance.

Should mature at 10' high, 3' wide. Midseason bloom. **Ripens late September.** Rootstock: M-106 semi-dwarf

**NEW! CRIMSON CRISP** An excellent scab-resistant apple out of the PRI breeding program, Crimson Crisp. **Ripens late September to early October** with crisp, sweet tart fruit that is deep purple-red. Midseason bloom. Keeps up to 4 months in refrigeration. Rootstocks: G-41 mini-dwarf, M-106 semi-dwarf **S** **B**

**BRAMLEY'S SEEDLING** Classic English cooking apple; originated as a seedling, circa 1837. Very large apples, quite tart, excellent for cooking. Midseason bloom. **Ripens early October.** Will not pollinize other varieties. Rootstocks: M-26 dwarf 🍷 **S** **B** **F**

**JONAGOLD** Considered one of the finest quality dessert and cooking apples on the market. Hard flesh, fine texture, rich full flavor. Large size, gold with red blush, very attractive. Vigorous tree, heavy producer. Midseason bloom. **Ripens early October.** Will not pollinize other varieties. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf 🍷 **B** **F**

**KARMIJN DE SONNAVILLE** Cox Orange Pippin cross. A connoisseur variety with a very nice texture and intense flavor that mellows after one month of cold storage. Another festival favorite! Performs best in cool summer climates. Midseason bloom. **Ripens early October.** Will not pollinize other varieties. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf 🍷 **F**

**SPARTAN** Ripens early October. Mac type; purplish red; good for fresh eating and cooking. Keeps through January; precocious and consistent bearer. Fair to good resistance to scab and mildew. Blooms mid-late season. Apples susceptible to premature drop. Rootstocks: G-41 mini-dwarf, M-26 dwarf **S** **B**

**BELMAC** Deep red fruit with sweet, crisp flesh. Very disease resistant cultivar developed in Quebec—scab immune, mildew resistant. Very productive. Stores well in refrigeration. Midseason bloom. **Ripens early October.** Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf **S** **B**

**HUDSON'S GOLDEN GEM** Excellent eating apple with crisp, sugary flesh and nutty, pear-like flavor. Dull yellow russet skin. Good keeper, disease resistant. Midseason bloom. **Early October ripening.** Rootstocks: M-26 dwarf, M-106 semi-dwarf **S** **B** **F**

**ANANAS REINETTE** (Pineapple Russet) Heirloom apple with small- to medium-sized, russeted golden fruit, and intense, sweet, sharp flavor that develops pineapple tones when fully ripe. Stores into January. Midseason bloom. **Ripens early to mid-October.** Rootstocks: M-26 dwarf, M-106 semi-dwarf **F**

**GOLDEN RUSSET** An antique variety, with golden brown skin and sugary, aromatic flesh. An excellent storage apple, good for sweet and hard cider. Very disease resistant, somewhat biennial-bearing habit. Midseason bloom. **Ripens early to mid-October.** Rootstocks: M-26 dwarf, M-106 semi-dwarf (pick up only) **S** **B** **F**

**GRIMES GOLDEN (self-fertile)** Heirloom apple with rich, aromatic sweet flavor, good for eating or cider. A parent of Golden Delicious. Midseason bloom. **Ripens mid-October.** Rootstocks: M-26 dwarf, M-106 semi-dwarf  

**NEW! CRIMSON TOPAZ** A promising scab- and mildew-resistant variety for our climate. Crimson Topaz has impressed us with its crisp, hard flesh and wonderful sweet-tart flavor. Stores 4–5 months. Midseason bloom. **Ripens mid-October.** Rootstocks: G-41 mini-dwarf  

**MELROSE** Outstanding dessert and cooking apple. Hard flesh, mellow sweet flavor. Heavy annual bearer. Mid- to late-season bloom. **Ripens mid-October,** but best for eating after Christmas when it develops its fruity aroma. Keeps till March–April. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf

**BENI SHOGUN FUJI** At last, a Fuji that ripens consistently for cool summer climates. Intensely sweet, crisp apple. Moderate resistance to scab. Keeps until March. Late bloom. **Ripens mid-October.** Rootstocks: G-41 mini-dwarf, M-26 dwarf 

**COSMIC CRISP** WSU cross of Honeycrisp and Enterprise. Very productive variety with large fruit, red over a green background. Fruit is crisp and sweet and stores well. Easier to grow than Honeycrisp. Mid- to late-season bloom. **Ripens mid to late October** in Western WA. Only available to plant in WA state. Rootstocks: M-26 dwarf, M-106 semi-dwarf   **\$32.95 each**

**IDARED** Solid bright red apple with crisp to tender, smooth-textured flesh. Good dessert and cooking apple. Tart at harvest but mellows in storage. Heavy, consistent bearer with some resistance to scab. Bears at a young age. Keeps in excellent condition until May. Early bloom. **Ripens mid- to late October.** Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf 

**ASHMEADS KERNAL** One of the finest russets of all time. Flat, gold-brown apple, very sweet and juicy. Over 200 years old and has won awards world-wide. Good keeper. Midseason bloom. **Ripens mid-October.** Triploid: will not pollinize other varieties. Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf   

**FLORINA** Large purple-red apple with aromatic spicy flavor. Vigorous tree and strong producer. Scab immune and mildew resistant. Fruit will keep into January or early February. Mid- to late-season bloom. **Ripens mid- to late October.** Rootstocks: G-41 mini-dwarf, M-26 dwarf, M-106 semi-dwarf  

**ROXBURY RUSSET** Heirloom russet with sweet aromatic flavor. Russet brown skin with a green undertone. Highly esteemed for eating, cooking, and cider. Stores well into February/March. Midseason bloom. **Mid- to late-October ripening.** Will not pollinize other varieties. Rootstocks: M-27 mini-dwarf, M-26 dwarf, M-106 semi-dwarf **(pick up only)**   

## edible crabapple

**CENTENNIAL** Small elongated fruits have a bright scarlet blush with a crisp, sweet flavor that makes them excellent for eating fresh and good for canning. This beautiful, ornamental tree is very compact, yet productive and scab resistant. Blooms early midseason. **Ripens mid-August.** Rootstock: M-106 

## hard cider apples

**KINGSTON BLACK** Considered by the British as one of the finest bittersweet cider apples of all time. Carries a complexity of flavors that would improve any cider blend, also can be made as a varietal cider. Fruit is medium sized with dark red blush. Late season bloom. **Ripens mid-September.** Rootstocks: M-111 semi-standard

**REINES DES POMMES** Bittersweet cider variety, soft tannins and high sugar make it suitable for varietal cider or blending. Very late bloom. **Ripens early to mid-October.** Rootstocks: M-111 semi-standard

**BROWN SNOOT** A productive bittersweet cider apple, slightly biennial. A good balance of sugars, acids, and tannins, suitable for varietal cider or blending. Late-season bloom. **Ripens in mid-October.** Rootstocks: M-26 dwarf

**DABINETT** Bittersweet variety, good for blending. Soft tannins, very high sugar. Biennial tendency. Midseason bloom. **Ripens mid- to late October.** Rootstocks: M-111 semi-standard 

## apple rootstocks

**\$4.00 each**

Graft your own apple tree. We ship rootstocks in early March—order early!

**M-26 Dwarf Rootstock**

**M-106 Semi-Dwarf Rootstock**

## apple rootstock info

**GENEVA 41 (Mini-Dwarf)** Grows to 5'–8' in height. Very productive for their size, these rootstocks also lend the trees resistance to replant disease and fireblight. Permanent support required. 4' spacing.

**M-26 (Dwarf)** Grows to 7'–12' in height, very productive and cold hardy; will not tolerate poorly drained soil. Requires staking in early years and permanently in some situations. 7'–9' spacing.

**M-106 (Semi-Dwarf)** Grows to 10'–15' in height and produces a well-anchored root system. Trees are precocious and very productive on this rootstock. Proven to handle a wide range of soil conditions, very hardy. Requires staking in early years. 10'–12' spacing.

**M-111 (Semi-Standard)** Grows 15'–20' in height. Tolerant of most soil types and somewhat drought tolerant. 15' spacing. tolerant. Space at least 15' apart.

## APPLE POLLINATION

Apples require careful attention to matching bloom times for good fruit set. In our cool spring climate, we have extended bloom times—other climates with warm springs may have more compressed bloom seasons that allow more pollinizer choices. The charts below are based on our experience in the Pacific Northwest; contact your local Master Gardeners or county agricultural extension agent for information about bloom times in your area.

## APPLE BLOOM TIMES

### very early

Gravenstein\*

### early

Centennial Crab	Williams Pride
Idared	Zestar!
Red Alkmene	

### midseason

Akane	Grimes Golden
Ananas Reinette	Honeycrisp
Ashmead's Kernal*	Initial @*
Belmac	Jonagold*
Bramley's Seedling*	Karmijn*
Crimson Crisp	Liberty*
Crimson Gold	Melrose
Crimson Topaz	Northpole
Cosmic Crisp	Queen Cox
Fiesta	Roxbury Russet*
Freedom	RubINETTE
Galarina™	Scarlet Sentinel
Golden Russet	Spartan
	Tsugaru

### late

Beni Shogun Fuji	Kingston Black
Elstar	Reines des Pommes
Florina	
Harry Masters Jersey	

### very late

Brown Snout

Choose your pollinizer from the same or adjacent columns. For example, Idared pollinizes Williams Pride (same column) or Akane (adjacent column), but not Elstar. Varieties marked with an asterisk\* do not work as pollinizers for other varieties (they have sterile pollen). Note: Bloom time does not correspond to ripening time. Choose varieties that ripen at different times to spread out your harvest, and check to make sure you have appropriate pollinizers.

Conference Pear

- Hardy to Zone 4
- Varieties suitable for the PNW
- All varieties need a pollinizer
- Pears tolerate heavy soil
- Look for **S** scab-resistant varieties for easiest growth
- Space 7'–9' on OHF87 semi-dwarf rootstock
- Harvest green, when stem separates easily from the spur

Chojuro Asian Pear

- Hardy to Zone 5
- Tolerant of heavy soil
- All varieties need a pollinizer
- Space 7'–9' on OHF87 semi-dwarf rootstock
- Ripen on the tree

## europaean pears \$29.95

varieties listed in order of ripening

**UBILEEN** Large, red-blushed pear with juicy, buttery flesh. Does not store well, but great for canning or drying. Early to midseason bloom. **Ripens early to mid-August.**

**ORCAS** Large, smooth, juicy pear with mild sweet flavor. Excellent for canning and drying as well as fresh eating. Vigorous and bears heavily. Originated on Orcas Island as a seedling. Midseason bloom. **Ripens early September.**

**RESCUE** Large yellow pear with red blush. Excellent flavor, great for fresh eating, canning, and drying. Disease-resistant. Midseason bloom. **Ripens early to mid-September.** **S**

**MANON** Excellent quality, mid-length storage. Disease resistant. Midseason bloom. **Mid-September ripening.** **S**

**CONFERENCE** A longtime European favorite. Medium-sized, golden-speckled, long-necked pear with an intense, sweet, distinctive spicy flavor. Can be eaten right off the tree or stored in refrigeration for months. Strong producer. **Early season bloom. Ripens late September.** **S**

**ARMIDA** A flavorful pear of excellent quality. Very compact, almost dwarf habit. Scab resistant. Early bloom. **Ripens late September.** **S**

**COMICE** This pear has a juicy, fine buttery texture and flavor. Large broad-based shape. Dull yellow when ripe. Needs one month of storage before ripe. Stores well until Christmas. Late season bloom. **Ripens early October.**

**BEURRE BOSC** A large, long-necked, golden-brown russeted pear. The flesh is finely textured and tender, with a spicy rich flavor. Very productive. High-quality pear, keeps well. Mid- to late-season bloom. **Ripens early to mid-October.**

## asian pears \$29.95

**SHINSEIKI** Yellow-skinned fruit with white flesh and sweet mellow flavor. Medium large fruit keeps into January. Spreading type tree. Early midseason bloom. **Ripens mid-August.** (pick up only) **S**

**HAMESE** A good producer of yellow-skinned, very sweet, crisp pears. Consistent quality, year after year. Early midseason bloom. **Ripens mid-to-late August.** (pick up only) **S**

**NIJISEIKI** Also known as '20th Century,' this delicious yellow-skinned variety is the one found in the gourmet fruit sections of many markets. It is the most popular variety in Japan. Very juicy with good balance of sweetness and tartness. Vigorous tree. Early season bloom. **Ripens late August.** **S**

**KOSUI** Round, golden fruit of superb quality. Flesh is tender and juicy. One of the best flavored Asian pears available. Trees are vigorous and productive. Medium-sized fruit. Good keeper. Early to midseason bloom. **Ripens early to mid-September.** **S**

**MISHIRASU** Very large fruit, shaped and flavored more like a European pear. Flesh is intensely sweet, quite crisp and crunchy, with a golden speckled green skin. Highly rated at our tasting. Early season bloom. **Ripens mid-to-late September.** (pick up only) **S**

**CHOJURO** Fruit size is large. Very good quality, spicy-aromatic fruit. Flesh is crisp with a russeted brown skin. Good for home storage. Keeps until March. Medium-size tree. Early season bloom. **Ripens mid-to-late September.** **S**

Choose your pollinizer from the same or adjacent columns. Note: Bloom time does not correspond to ripening time. Choose varieties that ripen at different times to spread out your harvest, and check to make sure you have appropriate pollinizers.

## pear rootstock

**OHF-87 (Semi-Dwarf)** For use with European and Asian Pears. Precocious and productive. Suitable for high-density plantings and espalier. Can be maintained at 10'–12'. Space 7'–9'. A true Pyrus—hardy to Zone 4.

# hybrid pears \$29.95

**MAXIE™** A cross of Nijiseiki Asian Pear and Red Bartlett European Pear. Maxie is round, crisp and juicy like an Asian Pear, but with the complex European-Pear flavor. Early bloom. Ripens on the tree in late August to early September. **\$29.95**

**SHIPOVA** A cross of European Pear and Mountain Ash, bearing plum-sized fruits in early September that have a sweet, delicate flavor. Partially self-fertile, but better fruit set if a European-Pear pollinizer is nearby. Grows to 10'–15'. **\$34.95**

Imperial Epineuse Plum

## plums \$32.95

- Hardy to Zone 4
- Varieties chosen for disease resistance
- Most varieties need a pollinizer
- European plums pollinize other European plums (bloom too late for Japanese)
- Japanese plums pollinize other Japanese plums (bloom too early for European)
- Tolerant of most soils
- Space 8'-10' on Krymsk 99 dwarf rootstock
- Space 10'–14' on St Julian A semi-dwarf rootstock

### european plums varieties listed in order of ripening

**ELMA'S SPECIAL** Comes from an old orchard in Bellingham, and is probably an old variety known as Sanctus Hubertus. Purple-skinned fruit is very high quality, freestone, medium to small. Fleshy, juicy, full rich flavor. Consistent heavy bearer. Excellent fresh or processed, exceptional dried and in jam. **Ripens late July to early August.** Rootstocks: Krymsk 99 dwarf, St. Julian A semi-dwarf

**IMPERIAL EPINEUSE** An antique French prune variety that sets the standard in prune plum flavor. Excellent prune plum for drying. The sweet, firm, freestone fruit **ripens early to mid-August.** Rootstock: Krymsk 99 dwarf, St Julian A semi-dwarf

**YELLOW EGG** Large oval, bright yellow plum with yellow flesh. Excellent for fresh eating or canning. **Ripens early September.** Rootstock: St Julian A semi-dwarf

**STANLEY** (Italian Prune type) Excellent for cooking and eating fresh. Hardy, vigorous, and produces full crops annually. The fruit is large, dark blue, juicy, and good quality. Partially self-fertile. **Ripens early to mid-September.** Rootstock: St Julian A semi-dwarf

**QUEEN VICTORIA** A large, oval, pinkish-purple skinned freestone plum with sweet, golden flesh. Excellent fresh or dried. Partially self-fertile. **Ripens late August.** Rootstock: St Julian A semi-dwarf

### japanese plums

Fortune Japanese Plum

**METHLEY** (Self-fertile) Earliest ripening plum. Fruits are reddish purple with juicy, sweet, red flesh. Production is consistent and very heavy. **Ripens mid-to-late July.** Rootstock: Krymsk 99 dwarf, St Julian A semi-dwarf

self-fertile, Methley is a good pollinizer. Rootstock: St Julian A semi-dwarf

**SHIRO** Yellow skin and flesh with very sweet, juicy flavor. Consistent bearer, very productive. Most consistent producer of the Japanese types for this area. **Ripens early August.** Rootstock: St Julian A semi-dwarf

**PEACH PLUM** Very large fruit with apricot color. This plum has extraordinary texture and flavor. Truly a delight to eat. The tree is vigorous and moderately productive. **Ripens mid-to-late August.** Rootstocks: Krymsk 99 dwarf, St Julian A semi-dwarf

**HOLLYWOOD** Truly an edible ornamental! Pale pink flowers and deep purple foliage are a bonus to the deep red fruit that **ripens mid-August.** Excellent for plum jelly. Partially

**FORTUNE** Large fruit has reddish-purple skin. The firm flesh is very sweet and flavorful. Semi-freestone. **Ripens late August.** Rootstocks: Krymsk 99 dwarf

### peach & plum rootstocks

**KRYMSK 99 (Dwarf)** A precocious dwarf rootstock for plums and apricots, Krymsk 99 can be kept under 10'–12'. Very productive, heavy crops may need thinning for good fruit size. Not drought tolerant.

**ST. JULIAN A (Semi-Dwarf)** Precocious and productive and well anchored. Grows to 12'–15'.

**KRYMSK 86 (Semi-Dwarf)** Slightly larger than St. Julian A. Well anchored and tolerant of heavy soil. Grows to 15'.

Betty Peach

- Hardy to Zone 5
- All varieties are self-fertile
- Need well-drained soil and warm site
- Manage for Peach Leaf Curl while trees are young
- Space 10'-12' on St. Julian A semi-dwarf rootstock
- Space 12'-15' on Krymsk 86 semi-dwarf rootstock
- Space 12'-15' on Lovell semi-dwarf rootstock
- Intensely flavored varieties

## peaches \$32.95

### varieties listed in order of ripening

**AVALON PRIDE** Selected in Western Washington, this semi-freestone, red-skinned peach is leaf-curl resistant and sets fruit well in our maritime climate. Sweet, yellow-fleshed peaches ripen **early August**. Plan to control for Peach Leaf Curl on young trees. Rootstocks: St. Julian A Semi-Dwarf

**BETTY** A leaf-curl-resistant peach discovered in Ferndale. Late blooming, Betty has firm, semi-freestone fruit of excellent quality. Fruit ripens **early to mid-August**. Young trees should be managed for peach leaf curl. Rootstocks: St. Julian A semi-dwarf, Krymsk 86 semi-dwarf

**NEW! NANAIMO™** Nanaimo is a new leaf-curl-resistant peach, discovered in British Columbia, that performs well in the rainy springs of the Pacific

Northwest. Red-blushed fruit is freestone, sweet and tasty, ripening **early to mid-August**. Lovell semi-dwarf

**FROST PEACH** Yellow-fleshed fruit with flavor similar to locally grown Red Havens. Large to medium size with soft flesh. Very heavy bearing and must be thinned. Generally freestone and resistant to split pit. Leaf-curl resistant, with showy blooms. Ripens **mid-August**. Rootstock: St. Julian A semi-dwarf, Krymsk 86 semi-dwarf

**SALISH SUMMER (Q-18)** A WSU introduction. Salish Summer is a white-fleshed peach, semi-freestone, ripening **mid-August**. Curl resistant once established; young trees should be managed for Peach Leaf Curl. Rootstocks: St. Julian A semi-dwarf

## peach leaf curl

We suggest Sulfur or Copper-Sulfate mixed with a sticker, which holds the chemical on the plant longer. For specific concentrations of chemicals, read the label. Spraying must happen when leaves are off the tree. First spray: at bud swell, approximately mid-January. Second spray: approximately three weeks after bud break or first spray. Third spray: three weeks after second spray. Varieties resistant to leaf curl should be sprayed until well established. Even established resistant trees may show some leaf curl in certain springs, but will recover quickly.

Puget Gold Apricot

## apricots \$32.95

- Hardy to Zone 5
- All varieties are self-fertile but set more fruit if a pollinizer is planted
- Need warm, well-drained site protected from late frost
- Space 10'-12' on St. Julian A semi-dwarf rootstock

**PUGET GOLD** This is the most proven variety for the Pacific Northwest. Blooms later than most cultivars, usually avoiding most damaging frosts. Fruit is large with classic apricot shape and bright-orange, freestone fruit. Ripens **early to mid-August**. Rootstock: St. Julian A semi-dwarf

**HARGLOW** A late blooming apricot variety that shows promise for the Pacific Northwest. Large, deep-orange fruit with excellent flavor. Ripens **a little after Puget Gold**. Shows good disease resistance. Rootstock: St. Julian A semi-dwarf

Montmorency Tart Cherry

## tart cherries \$32.95

### varieties listed in order of ripening

- Hardy to Zone 5
- Space 8'-10' on Gisela 5 dwarf rootstock
- Space 15'-20' on Mazzard semi-dwarf rootstock
- Stake dwarf trees to support fruit load
- Self-fertile
- Will not pollinate with sweet cherries
- Easiest cherries to grow
- Protect from birds

**MONTMORENCY** Medium to large fruits, bright red in color. Standard tart cherry for commercial or home plantings. Good quality and flavor. Very precocious and productive. Ripens **mid-July**. Rootstocks: Gisela 5 dwarf, Mazzard semi-dwarf

**DANUBE** Large-sized fruit with burgundy-red skin. The flesh and juice of this cherry make for wonderful pies and jams. High sugar for a pie cherry. Ripens **mid- to late-July**, vigorous and productive. Rootstock: Gisela 5 dwarf (**pick up only**)

**MORELLO** Dark-red pie cherry. Highly productive, excellent quality fruit. Ripens **late July**. Rootstocks: Gisela 5 dwarf, Mazzard semi-dwarf

Black Gold Cherry

## sweet cherries \$32.95

varieties listed in order of ripening

- Hardy to Zone 5
- Space 10' on Gisela 5 dwarf rootstock
- Space 10'–15' on Krymsk 6 dwarf rootstock
- Space 12'–15' on Mazzard semi-dwarf rootstock
- Stake dwarf trees to support fruit load
- Proven crack-resistant varieties
- Most varieties need a pollinizer
- Best in well-drained soil

**BLACK GOLD** (self-fertile) Very late blooming black cherry, escaping most frost. The tree also has good canker resistance. The large, firm black cherries are crack-resistant, have excellent flavor, and **ripen early to mid-July**. Rootstocks: Gisela 5 dwarf, Krymsk 6 dwarf

**RAINIER** Large, yellow, Royal Ann type. Firm flesh; high quality for eating and canning. Trees are vigorous, productive and very hardy. **Ripens mid-July**. Rootstocks: Gisela 5 dwarf

**WHITE GOLD** (Self-Fertile) An excellent red-blushed yellow cherry. White Gold is crack-resistant and resistant to bacterial canker. **Ripens in mid-July**. Rootstocks: Gisela 5 dwarf

**STARLETTA™ 'Tom's Blush'** (self-fertile) Large, red-blushed yellow cherries, ripening just after Rainier, **mid- to late-July**. Very resistant to bacterial canker. Rootstock: Krymsk 6 dwarf

**VANDELAY** (self-fertile) A reddish black cherry from Canada that resists bacterial canker. Very large, firm, crack-resistant cherries with excellent flavor. **Ripens mid- to late-July**. Rootstock: Gisela 5 dwarf

**LAPINS** (self-fertile) Dark, crack-resistant cherry, firm with great flavor. **Ripens late July or early August**. A great cherry tree if you can only have one! Rootstocks: Gisela 5 dwarf, Mazzard semi-dwarf

### cherry rootstock info

**DWARF GISELA #5** The growth habit on this rootstock is more spreading than upright—a desirable trait for cherries on trellis systems. Root anchorage is only fair, so staking is necessary. The stake is also extremely valuable for tying up branches laden with fruit. Can be maintained under 10' and is suitable for trellis systems. 8'–10' spacing.

**DWARF KRYMSK 6** Precocious with good anchorage and some tolerance of wetter soils. Unlike Gisela, productive varieties will not overset and produce small fruit on this rootstock. Can be maintained at 10'–12'. 10'–12' spacing.

**SEMI-DWARF MAZZARD** Tolerant of heavy soils. Well anchored, so only initial staking needed. Vigorous sweet cherries on Mazzard will become large trees if not pruned. Sweet cherries can be maintained to 15'–18', tart cherries at 12'–15'. 15'–20' spacing

## getting started with UFO cherries

The Upright Fruiting Offshoots (UFO) system for sweet cherries was developed to simplify training, pruning, and crop management. At maturity, the UFO system yields a fruiting wall that is productive and simple to maintain. Each tree has a permanent single horizontal trunk from which fruiting shoots are grown vertically. Fruit are borne predominantly on spurs but also at the base of 1-year-old shoots, all on vertical wood. Establishing the UFO system is straightforward with little to no pruning required at planting.

### SPACING:

- Space rows 9'–10' apart;
- In the row, space trees 5'–6' apart (Gisela 5 Rootstock);
- Trellis should be at least 5 wires—lowest wire at 20", then spaced every 18"–20";
- Unbranched (whip) trees are planted at a 45-degree angle, pointing the terminal to the south (important: do not plant the trees vertically and bend them to a 45-degree angle);

For complete growing and training details, visit the [Training UFO Sweet Cherries](#) page on our website.

Oregon Champion Gooseberry

- Hardy to Zone 3
- Full sun to partial shade
- Grow 4'–6' high, space 4'–6'
- Ornamental shrubs easily trained as espalier or standard
- Excellent fruit for fresh eating, jams, and cooking
- Ripen in July
- Black currants and thorny gooseberries are deer resistant
- 1 gl. size

# currants & gooseberries

## currants \$14.95

**ROVADA (Red)** Very large fruit borne on long chains make picking a breeze. This selection from Holland is quite productive and very disease resistant too! Excellent for preserves or eating fresh.

**BEN SAREK (Black)** A disease-resistant black currant from the Scottish Research Institute. Compact bushes are loaded with large, shiny black fruit. Mildew and rust resistant. Grows to 3'–4'. (available late spring 2021)

**TIBEN (Black)** Black currant from Poland with excellent disease resistance. High yielding and easy to grow. Late ripening and very sweet.

**WHITE PEARL (White)** Highly productive cultivar. Beautiful pinkish-white translucent fruit is sweet and flavorful. Attractive upright growth habit. (available late spring 2021)

## gooseberries \$14.95

**ACHILLES RED** Large fruit can be used green for cooking or allowed to ripen to deep red for fresh eating. Later ripening than many varieties. A compact growing plant with good rust resistance.

**BLACK VELVET** Extremely productive variety with sweet, dark-red fruit with a blueberry-like flavor. Good disease resistance.

**POORMAN** Vigorous, very productive upright plant that produces the sweetest gooseberry you'll ever eat. Berry size is large with pinkish red color. Very disease resistant.

**OREGON CHAMPION** Medium-large yellow-green berries ripen midsummer. Fewer thorns than many gooseberries. Mildew resistant. Spreading plant. Grows 3' tall, 4' wide.

**ORUS 8** Medium-sized dark-purple fruit with wonderful flavor—considered one of the best gooseberries for fresh eating. This cross of gooseberry and black currant is very pest and disease resistant.

Blueberries

# blueberries \$16.95

## varieties listed in order of ripening

- Blueberries ripen July–August
- Mature at 3 ½'–6' high
- Space 3 ½'–6' at planting
- Best in moist, acidic soil
- 1 gl. size

**SPARTAN** Giant, light blue berries have a delicious tangy, sweet flavor. Upright habit, to 5'–6', with bright gold and orange fall color. **Ripens late June-early July.** Hardy to Zone 5.

**REKA** Very productive and vigorous, Reka bears medium to large, dark-blue berries with excellent flavor. Tolerant of most soil types, even winter wet. **Ripens late June-early July.** Hardy to Zone 4.

**PATRIOT** Large dark-blue, highly flavored berries. Producing 10–20 lbs. of fruit at maturity. Will perform in wet soils better than most varieties. Spreading growth habit to 4'. **Ripens starting early July over several weeks.** Hardy to Zone 3.

**DRAPER** Large crisp, light-blue berries are easy and quick to pick. Mild sweet flavor. Stocky, upright habit, grows 4'–6' high. **Ripens early to mid-July over several weeks.** Berries hold well on the bush. Hardy to Zone 5.

**NORTHLAND** Medium-sized berries are very sweet. Bush is vigorous with spreading habit. Extremely productive: over 20 lbs. per bush. Good choice for freezing—they ripen all at once. 4' tall at maturity. **Ripens early- to mid-July.** Hardy to Zone 3.

**BLUE CROP** Berries are medium-large and light blue with firm flesh. Flavor good, moderately aromatic. Plant is vigorous and a consistent heavy producer. Spreading growth, 6' tall at maturity. **Ripens mid-July.** Hardy to Zone 4.

**TORO** Very productive, producing heavy clusters of giant sky-blue fruit. An excellent ornamental blueberry, with showy, bright pink spring flowers and red fall foliage. Mature at 4'. **Ripens mid-July.** Hardy to Zone 4.

**SUNSHINE BLUE** (self-fertile) This semi-dwarf, semi-evergreen blueberry is a compact bush, growing to 3' tall. Showy hot-pink flowers yield large crops of high-quality dime-sized fruit. Harvest can last 9 weeks. Will tolerate higher pH than most blueberries. An excellent patio plant. **Ripens starting mid-July.** Hardy to Zone 5.

**CHANDLER** Giant berries with delicious flavor! The huge berries ripen over a six-week period. Upright spreading form, reaching 5'–6' at maturity. **Ripens mid- to late-July.** Hardy to Zone 4.

**CHIPPEWA** Large, light blue berries with an excellent sweet flavor. This compact bush grows to 3'. **Ripens mid- to late-July.** Hardy to Zone 3.

**LIBERTY** Large, sky-blue berries are firm with excellent flavor. Vigorous and productive. **Ripens over a 2–3-week period from late July into August.** Hardy to Zone 4.

## blueberry relative

**EVERGREEN HUCKLEBERRY (*Vaccinium ovatum*)** Produces a multitude of white or pinkish bell-shaped blossoms in April and May, and tasty blue-black berries in **late August and September.** Prefers a shady environment but can take full sun in cooler areas. Erect shrub grows 8'–10' in partial shade, 4'–5' in full sun. Prefers acid soil and mulched roots. Hardy to Zone 7. **1 gl. - \$16.95**

Thornless Triple Crown  
Blackberry

## blackberries \$10.95

### varieties listed in order of ripening

- Best in well-drained, fertile soil
- Protect from severe winter cold
- Provide trellis support
- Best crops with ample summer water
- Ripen July-August
- Space 4'–6' at planting
- We sell 2-yr.-old canes

**MARIONBERRY** A medium to large blackberry with bright red to reddish black fruit, excellent sweet flavor. This is one of the most productive and vigorous blackberries. Fruits are long and conical with medium firmness, perfect for fresh eating and for processing. Ripens late July into early August in the Northwest. Hardy to Zone 7.

**THORNLESS TRIPLE CROWN** Very productive vines bear huge sweet berries beginning in August and continuing till frost. Well-managed plants have been reported to bear over 30 lbs. of fruit per plant. Hardy to Zone 5.

## strawberries bundle of 20 - \$10.95

- Main croppers for one big June or July crop
- Day-neutral (everbearers) for all-summer crops
- 10"–18" spacing
- Well-drained fertile soil, full sun
- Disease-resistant varieties produce 4–6 years before needing replanting

### everbearing (day-neutral)

Hardy to Zone 4

Prune runners and thin first set of blossoms for best production

**SEASCAPE** Excellent flavor with heavy yields of large berries and good disease resistance. A proven cultivar in the Northwest: low chill requirements make it promising for warm winter climates.

**SWEET ANN** A new day-neutral cultivar from Lassen Canyon Nursery. Sweet Ann is productive, producing large fruit with excellent flavor. Does not produce prolific runners. Very disease resistant.

### main croppers (June bearers)

Hardy to Zone 6

**TILLAMOOK** Large to very large berries ripen midseason. Very firm, great for fresh eating or freezing. Good disease resistance.

**MARY'S PEAK** A new variety developed for the PNW. Large firm berries with excellent flavor good for fresh eating or for processing. Upright plants are very productive. Ripens late season.

Fall Gold Raspberry

# raspberries

1-4 \$6.95 each / 5-9 \$5.79 each / 10+ \$4.50 per variety

- Hardy to Zone 6
- Space 24"–30" when planting
- Best in fertile, well-drained soil
- Do not plant too deep! This is the #1 reason for failure
- Summer raspberries bear heavy crops on second year canes
- Fall raspberries bear on 1 and 2 year canes, can produce 2 light crops each year, or 1 heavy crop in autumn

## summer bearing

**MEEKER** Fruit is large, rich red, and firm. Outstanding fruit with excellent quality for fresh eating and processing. Very productive. In the coldest areas, plant in protected areas if possible. Somewhat resistant to berry rot.

**CASCADE DELIGHT** Very large berries are bright red, quite firm, with excellent flavor, rivaling Tulameen. Productive plants are resistant to root rot, suitable for wetter ground than Tulameen or Meeker.

**TULAMEEN** Firm, very large, light-red aromatic fruit is produced over a long summer season in July and August. Good flavor, productive, and easy to grow in a wide range of soils.

## fall bearing

**CAROLINE** An early cropping, fall fruiting, red-raspberry cultivar known for its exceptional flavor. Extremely productive with large, firm fruit. Somewhat tolerant of root rot. Fruit ripens mid-August until frost or rain halts production.

**FALL GOLD** Enjoy intensely sweet, golden yellow berries from late-August until mid-October. A great change from red varieties. Medium to large size berries with good yields.

# hazelnuts \$29.95

- Hardy to Zone 5
- Trees mature at 15'–20'
- Tolerant of most soils
- All varieties need a pollinizer, best nut set with 3 or more varieties
- All varieties are very resistant to Eastern Filbert Blight

**JEFFERSON** High quality, large nuts on a compact, very blight-resistant cultivar. Low blank ratio. For best pollination, plant with York, Theta, or Yamhill. 15' at maturity.

**THETA** A blight resistant hazelnut from OSU. Moderate sized tree bears medium sized nuts of good quality. Good pollinizer for Jefferson, York, and Yamhill.

**YAMHILL** A new OSU hazelnut with complete resistance to Eastern Filbert Blight. Compact habit, less than 10' tall, 12' wide at maturity. Small, high-quality nuts. Pollinizes with York, Jefferson, or Theta.

**YORK** A midseason pollinizer with a long bloom-season. Compatible with most cultivars, including Theta, Jefferson, and Yamhill. Highly resistant to Eastern Filbert Blight and produces round, medium-sized nuts.

# walnuts \$34.95

- Hardy to Zone 4
- Large trees, mature at 30'–40'
- Best in deep, well-drained soil
- Partially self-fertile, best nut production with a pollinizer
- Walnuts ripen mid-October

**CASCADE** An outstanding, relatively new selection. Very precocious and heavy producing. Care must be taken when cropping at an early age. Clusters of 6 or more nuts can bend the branches to the ground. Nuts are buttery and flavorful.

**MANREGION** Vigorous, fast-growing trees with lateral branching habit. Highly productive with large, high-quality nuts.

## almonds \$34.95

- Hardy to Zone 7
- Almond cultivars from the Ukraine
- Late blooming to escape most frosts - the reason most almonds fail to set nuts in the Northwest
- Trees will grow to 15'-20', space 15'
- Resistant to Peach Leaf Curl

**BOUNTY** A hardy, late blooming, Ukrainian variety that bears heavy crops of sweet, soft-shelled nuts. Somewhat self-fertile; larger crops if two varieties are planted. Not proven in Western WA, but worth trying.

**ORACLE** One of several new almond cultivars introduced from the Ukraine. Late enough blooming to escape most frosts. Oracle has sweet, soft-shelled nuts. Somewhat self-fertile; produces larger crops if two varieties are planted. Not proven in Western WA, but worth trying.

Ana Kiwi

## kiwi fruit

- Best in full sun, well-drained soil
- Support on trellis or arbor
- Plant both female and male plants together for fruit production
- Space 10'-15' at planting
- All of the kiwi fruits freeze well, whole or sliced
- We ship 1 gl. vines
- Larger plants available for pick up at the nursery

### hardy (*Actinidia arguta*)

\$19.95

Hardy to Zone 5

**74-49** (Female) Earliest ripening hardy kiwi in this group. Large, smooth-skinned fruit similar to Ana, but ripening a week or two earlier, starting late September. Pollinized by arguta male.

**ANANASNAJA ('ANA')** (Female) Vigorous vines with outstanding flavorful, spicy fruit. Smooth skin, no need to peel. Fruit is 1½" long. Ours ripen early October. Pollinized by arguta male.

**HARDY RED** (Female) Striking cranberry-red fruit with a delicious sweet-tart flavor, always a favorite in taste tests. Ripens early-to-mid -October. Pollinized by arguta male. Hardy to -25° F.

**JUMBO** (Female) Italian variety with one of the largest fruits of the hardy kiwis. Tasty sweet flavor, productive vines, slightly later ripening than Ana, in mid-October. Pollinized by arguta male.

**ARGUTA KIWI** (Male) Pollinizes up to 8 females; plant within 100' of females. Does not need extensive overhead trellising as it does not produce fruit.

### fuzzy (*Actinidia deliciosa*)

Hardy to Zone 7

**JENNY** (Female) A self-fertile fuzzy kiwi for the smaller yard! Jenny will produce kiwis that ripen mid-October, and store well in refrigeration. Planting in a protected area and wrapping the trunk of young vines at dormancy is recommended. (available late spring 2021)

**SAANICHTON** (Female) Similar to the kiwi you find in the markets, and proven in our area. Beautiful, vigorous vine with large fuzzy leaves. A delectable kiwi flavor with a fuzzy skin and attractive lime-green flesh, ripening mid-to-late October. Fuzzy kiwis store well, much longer than the smooth skinned hardy kiwis. Plant in protected locations. We recommend wrapping all the trunks with closed-cell insulation at dormancy; that seems to solve most cold-hardiness problems. Hardy to 10° F. 1 gl. - \$19.95

**CALIFORNIA** (Male) Necessary to pollinize Saanichton. Will pollinate up to 8 plants. (pick up only)

### variegated, hardy (*Actinidia kolomikta*)

\$19.95

Hardy to Zone 3

**SEPTEMBER SUN** (Female) These are the most ornamental vines of the kiwis we offer. The smooth-skinned fruit is high quality and the sweetest of the kiwis. It is also the smallest (¾" diameter); they can be eaten like grapes. Ripens early September in the Northwest; well suited for cool summer areas. This vine is not very vigorous so ideal for more confined locations. Both female and male vines are very attractive. Hardy to -40° F.

**KOLOMIKTA** (Male) Pollinizes up to 8 females. The male is particularly striking with its pink, white, and green variegated leaves. Retains leaf color best when grown in partial shade in a cool location.

## table grapes \$16.95

varieties listed in order of ripening

- Hardy to Zone 5 when established
- Own Root
- Needs trellis support
- Annual pruning required for full crops
- Space 4'–8' at planting

Northwest Washington has generally cool summers. Grape growers talk about Growing Degree Days when considering ripening times. Growing Degree Days (GDD) measure the accumulation of heat above 50°F during the summer. Much of Northwest Washington has GDD's of 1500–1700. If you live near I-5, or within 20 miles of salt water, the earlier ripening varieties will be the most likely to work for you.

**INTERLAKEN** Ripens mid-September. Golden clusters are medium in size with small berries. Bunching tends to be uneven in some years. Fruit quality is outstanding.

**LYNDEN BLUE (GIANT FREDONIA)** Concord type. Ripens mid-to-late September. Grown in Mission, British Columbia for more than 4 decades. Now easily found in gardens throughout

Lynden, Washington. Medium to large bunches, very large, dark blue-black berries; sweet mild flavor slip-skin with seeds. Good for fresh eating and juicing. Very popular at our fall fruit tastings. Very compact vine.

**JUPITER** Ripens mid-September. Large bunches of seedless blue-black berries. Excellent flavor, crisp berries. One of the best for cool sites.

**CANADICE** Ripens mid-to-late September. Pink seedless, with distinctive spicy flavor. A very consistent producer in cool summer climates. Has well-filled, loose clusters of medium-sized berries. Very hardy.

**VENUS** Ripens late September. Large bunches of blue-black berries, most years seedless but with an occasional soft seed. Distinctive flavor, consistent producer.

**RELIANCE** Ripens late September. Sweet-flavored red seedless grape, a popular favorite at our fall tasting. Clusters are full and berries large for the maritime climate. Very productive.

**MARS** Ripens mid-to-late September. Large bunches of blue-black berries, most years seedless but with an occasional soft seed. Excellent flavor, consistent producer when spur pruned.

**GLENORA** A seedless deep blue-black grape with slightly slip-skin like a Concord. An excellent variety if you love the Concord flavor but don't want seeds. Ripens late September to early October. On the border for ripening in the coolest sites.

**FAITH** A blue-black seedless grape ripening in late September. Very crack resistant. Best in a warm site.

**SATURN** Ripens early October. Productive variety with crisp, seedless red berries of excellent flavor. Has been very productive in local fruit test plots. Best in a warm site.

**HOPE** Green seedless grapes ripen in early October. Very productive and crack resistant. Needs a warm site to fully ripen in Western WA.

## wine grapes \$16.95

- Hardy to Zone 5 when established
- Own Root
- Needs trellis support
- Annual pruning required for full crops
- Space 4'–8' at planting

### white wine grapes

**MADELEINE ANGEVINE** A mid-September ripening, very worthwhile grape, giving heavy crops of green-white berries that yield large quantities of juice for wine, and may also be enjoyed fresh. Bunch rot and mildew susceptible. Makes an outstanding white wine. Needs 1600-1900 GDD to ripen. (available June 2021)

**ISKORKA** Originating in Russia (name means "sparkle"), it makes an excellent white wine with mineral notes. Needs 1600 GDD to ripen.

**SIEGERREBE** Ripens early September. Pink wine grape with small bunches. Good quality, low-acid maturity—makes excellent white wine. Moderately productive, medium vigor. Needs less than 1600 GDD to ripen.

**ORTEGA** An early ripening white wine grape, with high sugar levels and low acidity, grown for years on Vancouver Island. Makes a light, fruity wine. Very productive. Cross between Muller-Thurgau and Siegerrebe. 1600-1900 GDD.

### red wine grapes

**GARANOIR** A very early ripening red, of Swiss origin. This cross of Gamay Noir and Reichensteiner does not gain high sugars, but has low acids when ripe, making it an excellent grape for blending with higher sugar, higher acid juice. Under 1600 GDD needed to ripen.

**GOLUBOK** Russian origin; an early teinturier with a lot of potential for a unique full-bodied red wine. One of the most promising early reds in our trial; requires less than 1600 GDD to ripen.

**PINOT NOIR PRECOCE** An early ripening sport of Pinot Noir that is showing much promise in our grape trials. This clone of Pinot Noir can ripen up to three weeks earlier than other Pinot Noir clones. Acid will drop into very acceptable levels every year in our trials. Needs less than 1600 GDD to ripen. (available June 2021)

**PINOT NOIR 71 (French 777)** One of the most promising clones of Pinot Noir in our trials so far, ripening before the Wadenswill and Dijon

clones. Plant canopies must be well managed and cluster-thinned to achieve quality in all Pinot clones grown in this region. 1800–1900 GDD needed to ripen. (available June 2021)

**REGENT** A recent German cross. Bred mainly for the German organic wine industry. Regent is extremely resistant to diseases. Ripens at least a week ahead of Pinot Noir. Makes a full-bodied red wine in warm years. Promising in our grape trials, it should prove to be an excellent grape for the home gardener or winemaker. 1600-1900 GDD. (available June 2021)

**RONDO** A very early ripening red wine grape of German origin. Full bodied with deep red color. Very winter hardy. Approximately 1600 GDD needed to ripen. (available June 2021)

**ZWIEGELT** A recent Austrian cross. Makes an excellent fruity, Pinot-type wine. Very vigorous and highly productive, with very dark grapes. Tight clusters benefit from cluster thinning. Continues to gain sugar even in cool, wet falls. 1600-1900 GDD.

### dual purpose grape

**MUSCAT OF NORWAY** An early ripening red grape that has large berries in big clusters. This has performed well in the Northwest, needing under 1600 GDD to ripen. This small seeded grape is excellent for eating and also can be used to make a fruity blush wine.

## starting with grapes in the northwest

Our region differs from the main grape-growing regions of the world because of our lack of summer heat. But both table and wine grapes can be grown here successfully. A couple of tips to help you succeed:

- **SITE** - grapes absolutely need full sun, and should be sited in the warmest spot you have;
- **SOIL** - grapes prefer well-drained sandy or gravelly soil—if your soil is heavy, build raised beds or rows;
- **ON ESTABLISHED GRAPES**, thinning shoots and fruit bunches is essential to fruit quality;
- **TRAINING FOR WINE GRAPES:** Vertical Shoot Positioning (VSP) is a cane-pruning method that is easy to learn and maintain—new canes are trained on the lowest wire of a trellis, and shoots from those are trained vertically and bear fruit;
- **TRAINING FOR TABLE GRAPES:** curtain/spur-pruned systems are the most productive for table grapes. Permanent cordons are trained on a high wire—shoots grow from spurs on the cordons and hang down, each shoot bearing a bunch of grapes.
- **VISIT OUR GROWING TIPS PAGES** for more detailed information on growing grapes in our climate.

Training for wine grapes

Training for table grapes

# notable fruits

This is an assortment of several unusual fruits that can be grown in cool summer climates. Most of these have strong ornamental qualities to complement their culinary attributes. The selections we carry are virtually pest-free and easy to grow. Enjoy!

## chokeberry (*Aronia melonocarpa*)

Hardy to Zone 3

**EGERTA** Extremely ornamental shrub that produces showy white flowers followed by very large astringent, sweet blue-black berries that make excellent preserves and juice and are extremely high in antioxidants. Fiery fall foliage is a bonus! Easy to grow. Tolerant of wet soil. Grows to 6'. (**pick up only**)

Jersey Knight Asparagus

## asparagus \$19.95

Hardy to Zone 2

**JERSEY KNIGHT** An all-male variety of asparagus that out-produces older varieties. It sets very few berries, meaning more energy goes into producing sweet edible stalks. Asparagus likes well-drained soil and ample moisture; amend the bed heavily with manure before planting. 2-yr.-old crowns.

### figs

Fig can be very successful in the Northwest, but they need careful siting and some summer pruning to produce the best crops. Planting them against a south or west facing wall will increase the summer heat to hasten ripening. Because they are on their own roots, established figs can freeze to the ground in a severe winter and come back the following year.

## elderberries

Hardy to Zone 5

- Varieties selected for best fruit
- 8'–10' at maturity
- Full sun or partial shade
- For heavier fruiting, plant 2 varieties
- Available for pick up only

**YORK** Our most productive variety with large, dark purple berries. **Ripens mid-August.**

**NOVA** Our most vigorous plant with large clusters of dark purple berries. **Ripens mid-August.**

Desert King Fig

## figs \$19.95

Hardy to Zone 7

- Older fig trees are hardy to 10°F
- Best in warm, protected sites
- Try wrapping the fig trunk with closed-cell pipe insulation each winter
- 1 gl. size for shipping, larger sizes available for pick up only

**DESERT KING** Seems to be the most reliable and hardiest fig for the Northwest. Green skin with strawberry flesh. Delicious fresh and good for drying. **Ripens late July.**

**LATTARULLA** Also known as the Italian Honey Fig. Green skinned, honey colored flesh. Very compact habit.

**NEVERELLA** (also called 'OSBORNE PROLIFIC') Productive fig, promising in tests at the Mount Vernon Fruit Research Station. Deep bronze to brown fig with pale amber flesh. Hardy for the Northwest.

**OLYMPIAN** A great cool climate fig discovered in Olympia. Violet skinned figs have deep red flesh. Can ripen 2 crops in warmer sites.

## goji berry (*Lycium barbarum*) \$22.95

Hardy to Zone 5

**CRIMSON STAR** (Also known as Wolfberry) An attractive 6'–10' deciduous shrub that has light purple, bell-shaped flowers followed by bright red berries. The sweet, distinctive fruit has become famous lately for its antioxidant qualities. Sprawling, vine-like bushes. Full to part sun, well-drained soil. 1 gl. size plants.

## honeyberry (*Lonicera caerulea* var. *edulis*) \$22.95

Hardy to Zone 3

Very hardy, deciduous bush honeysuckles (honeysuckle relative). Produce small, fragrant white flowers followed by tasty fruits about the size and flavor of blueberries, ripening in June. These can fruit in shade or sun and are very hardy. Plant at least 2 varieties for fruit set. 1 gl. size plants.

**BLUE HOKKAIDO** Popular Japanese hybrid, with upright growth habit to 4'-5'; and large sweet-tart dark blue berries.

**BLUE MOON** Attractive spreading form, growing to 4' high and wide with bright green foliage.

**BLUE PAGODA** Widely grown Japanese variety, with upright growth habit to 4'-5'; and large sweet crisp blue berries.

**BLUE VELVET** Spreading, low growing form with velvety gray-green foliage. Grows to 3' high, 4' wide.

## Humulus lupulus 'Centennial' Hops

\$18.95

Hardy to Zone 5

A hops cultivar attractive to the home brewer for its aroma and brewing performance. Alpha acids 7-11%. Best in full sun and rich, well drained soil. Provide sturdy support. Hops die to the ground each winter. 1 gl.

Aromatanaya Quince

caption for product photos

## mulberry \$24.95

Hardy to Zone 5

**ILLINOIS EVERBEARING** Fruit quality is excellent for fresh eating and processing. Very precocious, bearing heavy crops at a young age. Fruits are 1½" long and wide. **Ripens early July and continues through September.** 1 gl. size plants.

caption for product photos

## olive (Olea europea)

\$24.95

Hardy to 10°F

In much of Western Washington, olives are grown for their ornamental quality rather than for fruit. Olives may produce if planted in a warm enough site, such as against a south or west facing wall, or in large containers wintered inside. Needs well-drained soil. 1 gl. size plants.

**ARBEQUINA** (self-fertile) A Spanish variety that is quite ornamental and early ripening in sites suitable for producing fruit. An evergreen tree, it grows to 10'-15' in many years, with soft gray, willow-shaped leaves.

**NEW! STAR OF CRIMEA** Selected olive from the Nikita Botanical Garden on the Crimea Peninsula. An evergreen tree, it grows to 10'-15' in many years with soft gray, willow shaped leaves. Uncertain whether self-fertile; best planted with a second variety for pollination if fruit is wanted.

## persimmon

**IZU (Self-fertile)** An early ripening, non-astringent Asian persimmon that should perform well in our climate. Izu has medium-sized fruit with excellent flavor, **ripening late October on a small tree (10'-15')**. Bring fruit inside before a hard freeze to continue ripening. Hardy to 0°F. (limited quantities, pick up only)

## quince \$29.95

Hardy to Zone 5

**AROMATNAYA (Self-fertile)** Sweeter than most quinces, excellent for preserves and cooking in both sweet and savory dishes. Upright habit. **Ripens October.** Very disease resistant.

## rhubarb \$9.95

Hardy to Zone 3

**CRIMSON CHERRY** Deep-red stalks with rich flavor; great in pies and sauces. Very productive variety.

## seaberry (Hippophae rhamnoides) \$15.95

Hardy to Zone 4

Also known as Sea Buckthorn, this large, nitrogen-fixing shrub slowly spreads by suckers. An excellent pollinator and good for anchoring slopes. Drought tolerant. Highest concentration of Vitamin C of any fruit. 1 gl. size plants, (limited quantities until late spring 2021)

**TITAN** (Female) Very large, flavorful berries are aromatic and bright orange. Grows best in sandy, well-drained soils, in full sun. Grows to 10'. Needs a male pollinizer to set fruit.

**MALE** A pollinizer for female Seaberry plants. One male can pollinize up to 8 female plants. A fine ornamental, with gray-green foliage and fuzzy brown flower buds in winter. Grows to 10'.

## tea (Camellia sinensis)

\$22.95

Hardy to Zone 7

The plant from which green and black tea is made. A beautiful broadleaf evergreen shrub, growing to 6'-8' with small, late fall flowers of fragrant white. Sun to partial shade, well-drained, acid soil. Seed sourced from a region in Korea known for its tea. 1 gl. size plant.

## yuzu (Citrus junos) \$27.95

The hardiest true citrus. Will survive short periods below 10°F. Small, seedy fruit has lemon-like juice and a rind strongly flavored like citron. Evergreen to 18°F. Worth trying outside in protected, milder areas of PNW. 1 gl. size plant

# ORNAMENTAL LANDSCAPE PLANTS

The catalog has only a partial listing of what's at the nursery! All plants are available for pick-up at the nursery. Only plants with a price and size can be shipped.

Our goal is to provide you with an extensive listing of well-grown, choice plants, many of which are truly unusual and merit attention in your garden.

## flowering garden trees

### AMELANCHIER X GRANDIFLORA 'AUTUMN BRILLIANCE' SERVICEBERRY

**Hardy to Zone 5** Usually a multi-stemmed shrub, these serviceberries are trained to a tree form. Prolific starry white flowers are followed by small dark blue fruit that attracts birds. Showy fall color is a blend of orange, yellow, and red. Grows to 10'-15' in 15-20 years, tolerant of both winter wet and summer drought. (pick up only)

**CERCIS CANADENSIS 'FOREST PANSY' REDBUD** Hardy to Zone 4 Spring flowers of rosy-pink line the bare branches before the large heart-shaped leaves emerge in shimmering red-purple. Golden fall color and winter branching add interest. Grows to 20'; best with some protection from coldest winter winds. (pick up only)

Cornus kousa -  
Satomi Dogwood

### cornus - flowering dogwoods

Hardy to Zone 5

The flowering dogwoods we carry are resistant to dogwood anthracnose, and perform best in rich, moist soil, in sun to part shade. Flowering dogwoods grow with spreading, layered habit. Their spring flowers are often followed by berry-like fruit that is a favorite of songbirds. They often have good fall color.

- **NEW! BLUE RAY** (Cornus kousa) A Chinese dogwood with prolific star shaped flowers of creamy white, blooming in late May to early June. The textural foliage has a slight blue cast, taking on red tones in fall.. Slow growing, eventually 15'-20' in height and spread. 3'-4' Bare root - \$79.95
- **SATOMI** (Cornus kousa) Deep-pink flowers bloom in June. Horizontal branching pattern and rich fall color add interest. Slow growing, eventually to 20'-25' in height and spread. (pick up only)
- **SCARLET FIRE** (Cornus kousa) Scarlet Fire was selected for it's deep fuchsia pink bracts which are pointed, and do not

overlap, giving them the appearance of deep pink stars. Grows to 20' in 20 years. 3'-4' Bare root - \$79.95

- **ROSY TEACUPS** This hybrid of Cornus kousa and Cornus nuttallii has wide, pink flowers with dark-pink edges. Slightly wider than tall, this dogwood should reach 20' in 20+ years. Very disease resistant. 3'-4' Bare root - \$79.95
- **VENUS** An exciting new cross from Rutgers University, combining the large white flowers of our native Pacific Dogwood, Cornus nuttallii, with the disease resistance of the Chinese Dogwood, Cornus kousa. (pick up only)

Stewartia rostrata -  
Pink Stewartia

### magnolias

- **GENIE** Deep maroon-purple blooms open over a long period of spring to early summer, often with a lighter second bloom in late summer. A compact, pyramidal form makes this magnolia suitable for smaller yards, growing to 10' high, 6'-8' wide in 10+ years. Hardy to Zone 5 (pick up only)
- **HONEY TULIP** A new magnolia from Felix and Mark Jury, suitable for smaller gardens, with an upright form to 12'. Golden goblet shaped flowers bloom in early spring. Hardy to Zone 5. (pick up only)
- **STELLATA 'ROYAL STAR'** A beautiful, slow growing magnolia, usually in multi-stemmed bush form, growing to 12' high and wide in 25-30 years. Pure white, star shaped flowers bloom early, late March to early April. A Great Plants Pick. Hardy to Zone 5

### MALUS - Scab-Resistant Flowering Crabapples for the Pacific Northwest Hardy to Zone 5

These small garden trees provide spring flowers and ornamental, bird-loved fruit in summer and fall. They

mature at 12'-15' and are tolerant of a variety of soils. We have chosen cultivars that require little or no disease management. They can also act as pollinizers for fruiting apples with the same bloom time. (pick up only)

- **EVERESTE** Midseason blooming, the white flowers are followed by 1½" tart red fruit that can be used for juice. The bright green foliage is very disease resistant.
- **PRAIRIEFIRE** Late season bloom of intense pink flowers followed by persistent, pea-sized, dark red fruit. The foliage emerges dark purple-red. Very disease resistant.

### OXYDENDRUM ARBORETUM – SOURWOOD

Hardy to Zone 5

Fragrant white bell-shaped blossoms appear in July-August on long panicles. The foliage turns shades of crimson and orange in autumn. Best in rich, acidic soil with ample water. Slow, narrow growth habit, to 15' in 20 years. A Great Plant Pick.

Styrax japonicum -  
Japanese Snowbell

**STEWARTIAS**

Small, four-season garden trees that have it all: picturesque branching, summer flowers, fall color, and winter bark interest.

- **monadelpha ORANGEBARK STEWARTIA** Small, white, camellia-like flowers bloom in June. Wine-red fall color. Beautiful flaking, reddish tan bark. Slow growing tree, maturing at 15'-20'. Hardy to Zone 6. (pick up only)
- **pseudocamellia JAPANESE STEWARTIA** This magnificent tree bears scented, white, camellia-like flowers, appearing in July. Fall foliage is subtle shades of red, orange, and pink. The bark pattern provides interest year-round. Slow growing, to 25' in many years. Hardy to Zone 5. 3'-4' Bare root - \$29.95 (larger sizes available for pick up only)

- **rostrata PINK STEWARTIA** A beautiful Stewartia, with rose-red buds that open in late June to large pink-flushed white flowers backed by a rose-red calyx. The seed pods are also deep rose-red. Fall color is a deep wine-red. Mature trees develop furrowed ornamental bark. Grows slowly, maturing at 15'. Best performance with ample soil moisture. Hardy to Zone 6. 1 gl. - \$39.95 (larger sizes available for pick up only)

**STYRAX JAPONICUS JAPANESE SNOWBELL**

Hardy to Zone 5

In early summer, white tubular, slightly fragrant flowers hang below the branches. Trunk is slender, often twisted in later years. Leaves are oval and dark green with scalloped edges, turning yellow in fall. Grows slowly to 20' in 20 years. Hardy to Zone 6. (pick up only)

**learning from our experience STEWARTIAS**

Stewartias are one of the most beautiful garden trees for our climate, and can provide year round beauty in the right site with their summer flowers, fall foliage color and lovely winter bark and form. They are not drought tolerant, so in well-drained soils, even established trees need supplemental water. Their best site is a north or east exposure with cool, organic rich soils.

**garden trees for foliage & form**

Acer griseum -  
Paperbark Maple

- Varieties native to PNW 

**ACER CIRCINATUM VINE MAPLE** Hardy to Zone 6  
Slow growing, to 20' at maturity. Light green leaves turn brilliant shades of yellow, orange, and red in the fall. 1 gl. - \$14.95 (larger sizes available for pick up only)

**ACER CRATAEGIFOLIUM 'VEITCHII' VARIEGATED HAWTHORN MAPLE** Hardy to Zone 6  
A small-growing tree for shade to part shade, Veitchii has delicate green leaves streaked with white. The foliage turns golden yellow to red in the fall. Grows to 12' in 10 years, eventually to 18'. A Great Plant Picks selection. (pick up only)

**ACER GRISEUM PAPERBARK MAPLE** Hardy to Zone 4  
One of the best trees for year-round interest. Leaves are three-lobed and medium green, turning brilliant shades of red and orange in fall. In winter, curls of purple-brown bark peel from its trunk and branches to expose the glistening orange-cinnamon inner bark. Grows to 20'-25'. (pick up only)

**ACER PSEUDOPLATANUS 'ESKIMO SUNSET' SYCAMORE MAPLE** Hardy to Zone 4  
A bold, variegated form of Sycamore maple, with bright splashes of pink, maroon, and cream on the green leaves. Grows to 10' in 10 years, eventually reaching 25'-30'. This tree stops traffic. (pick up only)

**ACER RUBRUM 'MAGNIFICENT MAGENTA' BURGUNDY BELLERED MAPLE** Hardy to Zone 4  
Very symmetrical branching habit with fall color that turns from brilliant red to intense burgundy. Fantastic fall color sets this Red Maple apart. Tolerant of winter wet soil and summer drought. Grows to 25' in 20 years, eventually to 50'. (pick up only)

**BETULA NIGRA 'HERITAGE' RIVER** Hardy to Zone 4  
Very symmetrical branching habit with fall color that turns from brilliant red to intense burgundy. Fantastic fall color sets this Red Maple apart. Tolerant of winter wet soil and summer drought. Grows to 25' in 20 years, eventually to 50'. (pick up only)

**CARPINUS JAPONICA JAPANESE HORNBEAM** Hardy to Zone 4  
Very symmetrical branching habit with fall color that turns from brilliant red to intense burgundy. Fantastic fall color sets this Red Maple apart. Tolerant of winter wet soil and summer drought. Grows to 25' in 20 years, eventually to 50'. (pick up only)

**CERCIDIPHYLLUM JAPONICUM KATSURA** Hardy to Zone 5  
An elegant Asian tree. Leaves are heart-shaped and emerge lime-green suffused with pink, turning a kaleidoscopic range of yellow, crimson, orange, pink and red in the fall.

- **MORIOKA WEEPING** A graceful weeping form of Katsura. Grows into a wide, rounded mound, maturing at 25'-30' high and 20' wide. 3'-4' Bare root - \$42.95
- **SEEDLING** At first columnar, then spreading and horizontally branching with age. (pick up only)

Fagus sylvatica -  
Red Obelisk Beech

**FAGUS SYLVATICA 'RED OBELISK' BEECH**

Hardy to Zone 5

A columnar form of beech with dark purple, dissected leaves that emerge in spring like purple-black feathers. Grows to 12' high and 3' wide in 10 years. (pick up only)

**FAGUS SYLVATICA 'PURPLE FOUNTAIN' WEEPING BEECH**

Hardy to Zone 5

This purple leaved Beech grows with a very narrow form, maturing at about 12' high and 3' wide in many years. A Great Plant Picks selection. 2'-3' Bare root - \$39.95

**PARROTIA PERSICA 'VANESSA' PERSIAN IRONWOOD**

Hardy to Zone 4

A beautiful deciduous tree known for its spectacular fall color. Graceful winter form and spidery winter flowers are

also notable. Vanessa was selected for its narrower form; a 10-year-old tree may reach 10'-15' high and 10' wide. A Great Plant Picks selection. (pick up only)

**QUERCUS GARRYANA OREGON WHITE OAK**

Hardy to Zone 7

Fast growing oak, matures at 50'-60' with rounded crown. Bronze-red to bright red fall color. Full sun, well-drained soil. (pick up only) 🌱

**RHAMNUS (FRANGULA) PURSHIANA CASCARA**

Hardy to Zone 6

Small, upright tree with large, glossy green leaves that develop good fall tones most years. Tolerant of wet or dry sites but prefers some shade. 1 gl. Size - \$15.95 🌱

# japanese maples

Every yard or landscape can benefit from the addition of these truly elegant garden trees that are somewhat drought tolerant once established, and not appealing to deer. The selections of Acer palmatum, Acer japonicum, and Acer shirasawanum below are a sample of what is available at the nursery. Prices are given for shippable, 1 gallon-sized trees, more sizes available for pick up at [www.cloudmountainfarmcenter.org](http://www.cloudmountainfarmcenter.org). Zones 5-8

Japanese Maple Grafting

## laceleaf japanese maples

- **FAIRY LIGHTS** (Acer japonicum) A dwarf form with highly cut leaves, growing to 5' high and wide over time. Very lacy green summer foliage turns brilliant shades of orange to scarlet in fall. 1 gl. - \$49.95; (larger sizes available for pick up.)
- **GARNET** A vigorous cultivar that forms a beautiful, cascading mound-shaped specimen, this maple is distinguished by its leaf color—the deep orange-red of the gemstone garnet. This color develops best when grown in sun. Grows to 9'. (pick up only)
- **HANA MATOI** A variegated laceleaf maple, with leaves of deep red that emerge splashed in pink and cream. The foliage background changes to deep green in summer shade. Mounded form, growing to 4' high and 5' wide in 10-15 years. 1 gl. - \$49.95 (larger sizes available for pick up)
- **ORANGEOLA** Finely cut leaves emerge orange-red in spring, changing to bronze-green in summer, then a brilliant red-orange in fall. Slow grower, reaching 5'-8' in 10+ years. A Great Plant Picks selection. (pick up only)
- **RED DRAGON** An excellent red laceleaf maple. The color is quite bright, and the plant grows quickly when young to make a beautiful focal point in your garden. (pick up only)
- **SPRING DELIGHT** A beautiful laceleaf Japanese maple with leaves that emerge peach toned, then mature to bright green. Fall colors are a blend of brilliant orange and red. Good sun tolerance. Mounded form, growing to 6'. (pick up only)

## classic japanese maples

- **DANCING PEACOCK** (Acer japonicum Aconitifolium) Also known as the 'Fern Leaf' maple. An upright form of Acer japonicum, with finely cut green leaves that turn scarlet in fall. This vigorous grower can reach 15'-18'. Tolerates full sun or part shade. A Great Plant Picks selection. (pick up only)
- **AKA KAWA HIME** This moderate-sized maple has bright red bark in the winter. Lime-green leaves turn golden and orange in autumn. Grows to 6-8 feet in 10 years. (pick up only)
- **AMBER GHOST** Foliage emerges bright red, then fades to pinkish amber, and matures to golden green with strong veining. Fall colors are golden-orange. Grows to 8' in 10 years. (pick up only)
- **AOYAGI** Known to some as the 'Green Coral Bark' Maple, with bright pea-green wood for winter interest. It has light-green foliage, turning bright golden in fall. Upright in habit, it grows to 8' in 10+ years, eventually to 15'-18'. Prefers part shade. (pick up only)
- **BENI KAWA** This spectacular maple is prized for its salmon-red bark, brighter than other coral bark maples. The small green leaves are edged in red when they first emerge in spring. Fall color is bright yellow. Upright habit, grows to 10'. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **EMPEROR** A vigorous, upright cultivar with deep purple-red foliage that holds its color all summer. Grows to 18'-20' in 10+ yrs. A Great Plant Picks selection. 1 gl. - \$49.95 (larger sizes available for pick up only)

- **HOGYOKU** Upright, spreading form with large green leaves that turn brilliant orange in autumn. Grows to 15' at maturity. Sun tolerant. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **HUBB'S RED WILLOW** A great willow-leaved cultivar, this small tree is vase-shaped, with long thin leaves of purple-red, turning brighter red in fall. Slow growing, to 7' in 10 years. Sun tolerant. (pick up only)
- **KI HACHIJO** A sturdy upright tree, maturing at 10'-12'. Green summer leaves develop a distinctive fall coloration of golden yellow suffused with rosy overtones, blending into light orange and red. The bark is green, striped white. Sun to part shade. (pick up only)
- **KI HACHIJO** A sturdy upright tree, maturing at 10'-12'. Green summer leaves develop a distinctive fall coloration of golden yellow suffused with rosy overtones, blending into light orange and red. The bark is green, striped white. Sun to part shade. (pick up only)
- **MATSU KAZE** A graceful tree, as wide as tall, with deeply divided spring leaves of purplish red that gradually change in summer to bronze green. Fall color is a spectacular orange red. Vigorous habit, grows to 15'. Good in full sun. (pick up only)
- **ORANGE DREAM** Spring foliage emerges peachy orange, gradually changing to bright yellow-green edged in orange. The fall tones are a blend of gold and orange, touched in red. An upright, spreading form, growing to 8' in 10 years, eventually reaching 15' or more. (pick up only)
- **OSHU SHIDARE** A red-leaved, slightly weeping form of Japanese maple, with branches that arch up then weep down. The deeply divided leaves emerge maroon, turning crimson in fall. 10' high and wide at maturity. Pea green bark adds winter interest. Sun or part shade. 1 gl. - \$49.95
- **OTAKI** This cultivar of *A. japonicum* has a wider than tall habit, eventually reaching 10'-12'. Large rounded leaves are rich green in summer, turning shades of red, gold, and orange in fall. (pick up only)
- **OSAKAZUKI** An old cultivar, Osakazuki is renowned for its brilliant crimson fall color. The large leaves are green in summer, and very sun tolerant. A moderate sized tree, growing to 10'-12' in 10 years. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **PURPLE GHOST** Spring leaves emerge deep purple-red with prominent black veins. Grows to 8' tall in 10 years, eventually reaching 12'-15'. Tolerant of full sun. (pick up only)
- **SEEDLING** Less expensive than grafted maples, these trees will vary in size, leaf shape, and fall color. Most will eventually become trees of 20' or more, with green summer leaves becoming shades of yellow, orange, and red in fall. (pick up only)
- **SHIGARAMI** Star-shaped leaves edged in red emerge in the spring, becoming green in summer. The fall color is a blend of gold, orange, and red. Upright, spreading habit, develops beautiful horizontal branching, grows to 10'. Appreciates afternoon shade. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **SUMINIGASHI** A vigorous, red-leaved Japanese maple. The deeply divided leaves emerge dark purplish-red, mature to red-bronze, then become brilliant crimson in fall. To 15'-20', sun tolerant. (pick up only)
- **TSUKASA SILHOUETTE** Small green summer leaves turn brilliant red in fall. Very narrow upright habit makes this maple suitable for small spaces. Grows, eventually to 15'-18' tall by 4'-5' wide. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **TSUKUSHIGATA** Star-shaped leaves emerge deep blackish-red in spring, with a deep red summer color brightening to crimson in fall. The chartreuse samaras (seeds) add contrast. A rounded tree to 10'-15', good in full sun. (pick up only)

## dwarf japanese maples

'Murasaki Kiyohime' Dwarf Japanese Maple

- **ARATAMA** A dwarf shrub maple, growing to 3'-4' in 10 years. Bright red new growth, becoming bronze-green in summer. The fall color is bright crimson. Sun tolerant. (pick up only)
- **BONFIRE** Brilliant crimson leaves emerge in spring, then slowly turn green in summer. The fall tones are scarlet. An upright stocky habit, growing to 5'-6' in 10 years. (pick up only)
- **CORAL MAGIC** Deep coral-pink leaves emerge in spring, slowly maturing to green in summer, then a stunning orange in fall. A semi-dwarf cultivar growing only to 6' in 10-15 years. (pick up only)
- **JERRE SCHWARZ** A shrubby dwarf maple with deeply divided leaves that emerge pinkish red. Summer color is a mix of green and red; more red in sun. Grows to 4'-5' high and wide in 10 years. (pick up only)
- **KATSURA HIME** Leaves emerge peachy orange, edged in red, then slowly turn to light green. The fall colors are a blend of gold and orange. New wood is touched in coral-orange. A slow-growing, upright form, to 8' high in 10 years. Best with afternoon shade. (pick up only)
- **MIKAWA YATSUBUSA** A beautiful dwarf with leaves that emerge light green with bright red tips, changing to bright green in summer. The leaves appear to be shingled on the branches. Matures at 5' high and wide. (pick up only)
- **MURASAKI KIYOHIME** A wonderful dwarf Japanese maple. Small green leaves emerge edged in red. In fall, the tree turns golden, touched with orange and red. It grows to 3'-4' high, 6'-8' wide. (pick up only)
- **OTAME ZAKURA** Celebrate spring by planting this small, shrubby tree. The leaves unfold a brilliant scarlet-pink, later fading to bluish pink and green. Both large and small leaves decorate every branch. Color intensifies in fall. Grows eventually to 8' high. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **RUSLYN IN THE PINK** This dwarf maple grows to 6' high, 4' wide in 10 years. Grow it for the brilliant hot pink spring foliage, which becomes green in summer. The fall tones are bright crimson-red. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **SHAINA** The leaves emerge a purple-red in spring and hold the color through summer. Fall colors are crimson touched in orange. Slow growing to 4'-5', as wide as tall. A Great Plant Picks selection. (pick up only)
- **TATTOO** A dwarf shrub form with a spreading habit. Small green leaves have a purple edge in spring and summer. Fall color is yellow to orange. 4' wide by 3' tall in 10 years. (pick up only)
- **VILLA TARANTO** Delicate, airy appearance, but a very sturdy Japanese maple. Distinctive, long thin leaves of light green touched in red turn gold and orange in fall. Narrow upright habit, maturing at 5'-6'. Part shade or sun. (pick up only)

## variegated or unusual foliaged maples

Autumn Moon Maple

- **ARIADNE** A colorful maple through the seasons, with leaves emerging orange-pink with golden veining, maturing to red with deep-purple veining. Fall colors are a blend of flame red with gold and orange. A small spreading habit, to 6'-8' high and wide. (pick up only)
- **COTTON CANDY** Leaves are strongly variegated, splashed with pink and white. Upright vase shaped habit, growing to 6'-8' in 10 years. 1 gl. - \$49.95; (larger sizes available for pickup)
- **FIRST GHOST** Spring color of nearly white leaves with deep-green veins and red tips. The color holds well into the summer. Fall color is yellow to orange. Grows to 7' high, 4' wide in 10+ years. Best with afternoon shade. (pick up only)
- **OLSEN'S FROSTED STRAWBERRY** A colorful Japanese maple with leaves that emerge strawberry pink, frosted with cream. In sun, the leaves hold their color, and will be veined in green and silver. Upright and vigorous, growing to 8' in 10 years. (pick up only)
- **OKUSHIMO** The bright green leaves are star shaped with the margins curled upward. Bright orange-gold fall color. Very narrow, upright vase-shaped habit. Grows to 15', tolerant of full sun. (pick up only)
- **SHISHIGASHIRA Lions Head Maple** This upright maple carries its crinkled, bright green leaves quite close to the branch. Fall coloration is striking gold and crimson. Slow growing to 8'-12' high & wide, depending on culture. Sun tolerant. A Great Plant Picks selection. (pick up only)
- **SISTER GHOST** Spring leaves emerge a pale yellow-green and develop prominent veining (reticulation) as they mature. The fall color is bright golden-yellow. Sister Ghost should reach 7'-8' in 10 years, as wide as tall. Needs some shade. (pick up only)
- **UKIGUMO** The "Floating Cloud" Maple, one of the most beautiful of the variegated Japanese maples. The green leaves are heavily marked in pink and white, turning pink in fall. Best in part to full shade. Matures at 8'-10'. A Great Plant Picks selection. (pick up only)
- **WILL'S DEVINE** A variegated maple with deeply divided leaves that go through many color changes. The green leaves have a reticulated pattern of white, pink, and coral tones. A spreading, shrubby habit, growing eventually to 8'. Best in part shade. (pick up only)
- **AUREUM GOLDEN FULLMOON MAPLE (Acer shirasawanum)** The leaves emerge in spring as round orbs of soft yellow-green. The pale leaves turn shades of yellow and orange to red in fall. Best with part to full shade. Slow growing to 5' in 10 years. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **AUTUMN MOON FULLMOON MAPLE (Acer shirasawanum)** The leaves emerge in spring as round orbs of soft yellow-green. The pale leaves turn shades of yellow and orange to red in fall. Best with part to full shade. Slow growing to 5' in 10 years. 1 gl. - \$49.95

## acer circinatum - vine maple 🌍

Acer circinatum 'Sunny Sister'  
- Vine Maple

Our native relative of the beautiful Japanese maples, vine maples have delicate branching, and wonderful fall color. We carry both seedling trees and selected cultivars. Best in part shade. Hardy to Zone 6

- Varieties native to PNW 🌍
- **BURGUNDY JEWEL** A red-leaved vine maple! Leaves emerge purple-red, and hold that color through the summer when planted in sun. Smaller than seedling vine maples, Burgundy Jewel will reach 6'-8' in 10 years. (pick up only)
- **DEL'S DWARF** New growth emerges bronze, changing later to deep green, then taking on fall tones of yellow, red, and orange. A slow-growing form of vine maple, reaching only 3' high in 10 years. (pick up only)
- **MONROE** Finely cut leaves and an open, airy form. Yellow fall tones. A slow-growing tree, eventually reaching 10' high and wide. Best in part to full shade. A Great Plant Picks selection. (pick up only)
- **SUNNY SISTER** A selected form of vine maple with stunning coral spring color. Slow growing, it should reach 6'-8' in 10+ years. 1 gl. - \$49.95 (larger sizes available for pick up only)
- **SEEDLINGS** Light green leaves turn brilliant shades of yellow, orange, and red in the fall. Slow growing, to 20' at maturity. 1 gl. - \$14.95 (larger sizes available for pick up only)

# broadleaf evergreen shrubs

Compact Strawberry Tree

- Varieties native to PNW 

## ARBUTUS UNEDO 'COMPACTA' STRAWBERRY TREE

Hardy to Zone 7

Evergreen large shrub or small tree, grows to 8' in 10 years. White, bell-like flowers bloom mid-spring, followed by ornamental, strawberry-like fruit. Best in well-drained soil, sun to full shade. Drought tolerant when established. A Great Plants Pick selection. (pick up only)

## ARCTOSTAPHYLOS COLUMBIANA HAIRY MANZANITA

Hardy to Zone 7

Pacific Northwest native evergreen shrub, can grow to 6' or more, usually smaller. Gray green leaves and cinnamon bark. Needs good drainage and protection from NE winds. Drought tolerant. 1 gl. - \$19.95 

## AUCUBA JAPONICA 'ROZANNIE' JAPANESE AUCUBA

Hardy to Zone 6

A slow-growing evergreen shrub, reaching 3' high and wide in 10 years. The deep green leaves are adorned with red berries in the fall, even without a male plant nearby. Tolerates sun to deep shade, deer resistant. Hardy to Zone 6. 1 gl. - \$15.95 (larger sizes available for pick up only)

## AZARA MICROPHYLLA BOXLEAF AZARA Hardy to Zone 7

Highly textural evergreen with tiny, glossy leaves. Upright growing, protect from NE winds. 1 gl. - \$15.95

- **GREEN AZARA** Dark green leaves and minute, yellow, chocolate-scented winter flowers. A narrow upright tree. Grows to 10'-15'.
- **VARIEGATA** Dark green finely textured foliage is splashed in white on this small evergreen tree, which can grow to 15'. Less upright than the green form. Tiny inconspicuous chocolate-scented flowers in late winter.

## BERBERIS REPLICATA LONGLEAF EVERGREEN BARBERRY

Hardy to Zone 7

A beautiful evergreen barberry with long, narrow leaves. The foliage emerges purple-red in spring, retaining a red blush through the summer. The early spring flowers are bright orange-yellow. Full sun, average soil. Grows to 6'. 1 gl. - \$15.95 (larger sizes available for pick up only)

## CALLISTEMON PITYOIDES 'MT. KOZCIUSCO FORM' ALPINE BOTTLEBRUSH Hardy to Zone 7

Compact growth of narrow, silky foliage. June brings bottlebrush flowers of creamy yellow. Needs well-drained, lean soil and full sun. Grows to 2'-3' high and wide. (pick up only)

## CALLUNA VULGARIS 'GOLD HAZE' SCOTCH HEATHER

Hardy to Zone 5

Grows to 12" high, 18" wide. Bright gold foliage and white flowers in August. Full sun, average soil. Shear in spring for compactness. Great for pollinators. 4" pots - \$7.95

## CAMELLIA JAPONICA 'GLEN 40'

Hardy to Zone 7

Large, double deep-red flowers are very formal rose-form, complementing the deep-green foliage. Upright in form and compact in habit, reaching 6' in 10-15 years. Best in well-drained soil and afternoon shade. Very prolific bloom. (pick up only)

## CAMELLIA SASANQUA 'KANJIRO'

Hardy to Zone 7

Deep cherry pink, semi-double flowers are accented by a puff of golden stamens in the flower center, and have a hint of fragrance. Fall to winter bloom. Spreading, almost weeping form with deep green foliage, reaching 8' high and wide in 10-15 years. Best in well-drained soil and afternoon shade. (pick up only)

## CAMELLIA SINENSIS TEA

Hardy to Zone 7

This is the plant from which green and black tea is made. A beautiful broadleaf evergreen shrub, growing to 6'-8', with small, late fall flowers of fragrant white. Full sun to partial shade, well-drained, acid soil. These are seedlings from a tea plantation in Korea. Excellent tea quality and productive. 1 gl. - \$22.95

## CEANOTHUS THYRSIFOLIA CALIFORNIA WILD LILAC

Hardy to Zone 7

This evergreen shrub is tolerant of drought and salt spray, loved by pollinators, and deer resistant. Best in full sun and fast draining soil with limited summer water.

- **COOL BLUE** Variegated evergreen foliage highlighted in early summer with pale blue flowers. Smaller growing than Victoria, Cool Blue will grow to 3'-4' wide and 5'-6' tall in 10 years. A Sunset Garden Collection plant. 1 gl. - \$15.95
- **VICTORIA** Proven for our climate, Victoria grows quickly to 6' high & wide, and can be sheared for a more compact form. Masses of dark blue flowers in spring. 1 gl. - \$15.95 (larger sizes available for pick up only)

## CISTUS X 'GRAYSWOOD PINK' ROCKROSE

Hardy to Zone 7

Soft, gray foliage topped by medium-pink flowers in June. Spreading, mounded form grows to 2'-3'. Full sun, well-drained soil. Deer resistant! 1 gl. - \$15.95 (larger sizes available for pick up only)

## CHOISYA TERNATA MEXICAN MOCK ORANGE

Hardy to Zone 7

This evergreen shrub is good in informal hedges or in a mixed-shrub border. Fragrant white flowers in early to mid-spring. Sun to part shade. All varieties grow to 6'-8' high and wide and can be kept smaller through pruning. Deer resistant. We offer 3 cultivars. 1 gl. - \$15.95 (larger sizes available for pick up only)

- **TERNATA** Bright green foliage.

- **SUNDANCE** New foliage emerges golden yellow: in sun, the leaves hold the yellow color; in shade they fade to lime green.

- **AZTEC PEARL** Deeply cut, rich-green foliage.

## COTONEASTER LACTEUS PARNEY COTONEASTER

Hardy to Zone 7

Evergreen shrub grows to 6'-8' with elegant arching branches. Subtle white June flowers are followed by showy red berries. For full sun or light shade, well-drained soil. Best with some protection from strong winter winds. (pick up only)

Hebe x Blue Mist

**DAPHNE ODORA 'MAE-JIMA' VARIEGATED WINTER DAPHNE**

Hardy to Zone 7

The evergreen leaves are edged in creamy gold. Pink buds open to intensely fragrant light pink flowers in late February through March. Best in afternoon shade, protected from cold winter winds. Grows to 4' high, 5' wide. Well-drained soil is essential. 1 gl. - \$24.95

**GARRYA ELLIPTICA 'JAMES ROOF' SILKTASSEL**

Hardy to Zone 7

Native to the PNW coast, this evergreen shrub has showy, long winter catkins of soft yellow. Sun to part shade, most soils, protect from severe NE winds. 1 gl. - \$16.95

**GARRYA X ISSAQUAHENSIS 'GLASNAVIN WINE' SILKTASSEL**

Hardy to Zone 7

A hybrid between 2 west coast natives, this large evergreen shrub is slightly hardier than Garrya elliptica. Wine-red stems with deep-green wavy leaves are highlighted in late winter by 3"-4" long bloom chains. Can reach 10'-12' high and wide. Drought tolerant once established. 1 gl. - \$16.95 (limited quantities)

**GAULTHERIA SHALLON SALAL**

Hardy to Zone 3

Evergreen groundcover. Grows in sun or shade, prefers rich, organic, moist soil. Grows to 2'-3' high. Spreads by underground runners. 1 gl. - \$12.95

**GREVILLEA VICTORIAE ROYAL GREVILLEA OR SILK OAK**

Hardy to Zone 7

Silvery evergreen foliage and early spring flowers of reddish orange. Very attractive to hummingbirds. Grows to 8' high and wide. Best in full sun, well-drained soil. (available early summer 2021)

**NEW! HALIMIUM LASIANTHUM WOOLLY ROCKROSE**

Hardy to Zone 7

Silvery evergreen foliage and early spring flowers of reddish orange. Very attractive to hummingbirds. Grows to 8' high and wide. Best in full sun, well-drained soil. 1gl. - \$15.95 (available early summer 2021)

**HEBE**

Hardy to Zone 7-8

Evergreen shrubs for sun to part shade, and well-drained soil. Protect from cold winter wind. (available early summer 2021)

- **PIMELEOIDES QUICKSILVER** Tiny silver leaves on arching black branches give this small evergreen a distinctive look. Smoky pink flowers bloom early summer. Grows to 1' high, 2' wide.
- **BLUE MIST** Evergreen shrub to 3' high and wide. Pale blue flowers in spring fade to white.

**LAURELUS NOBLIS BAY LAUREL**

Hardy to Zone 8

This evergreen shrub can reach 10' in protected areas. Culinary leaves with white flowers, followed by purple-black berries. Well-drained soil. Sun-part shade. A Great Plant Picks selection. 1 gl. - \$15.95 (larger sizes available for pick up only)

**NEW! LEPTOSPERMUM LANIGERUM WOOLLY TEA TREE**

Hardy to Zone 7

Interesting evergreen shrub from Tasmania. Tiny silvery foliage gives the shrub a woolly look. Prolific white flowers

in mid-spring are attractive to pollinators. Full sun, drought tolerant. Grows to 12' high, 10' wide, can be sheared. 2 gl. - \$29.95 (limited quantities)

**LONICERA CRASSIFOLIA CREEPING EVERGREEN HONEYSUCKLE**

Hardy to Zone 8

A groundcover honeysuckle with rounded, evergreen leaves. Tiny, cream-colored flowers bloom in late spring and are followed by ornamental blue berries. Full sun to partial shade, moist, organic rich soil. Our plant has easily survived temperatures of -5°F. Hardy to Zone 7. 4" pots - \$7.95 (limited quantities)

**LONICERA NITIDA 'RED TIP' BOX HONEYSUCKLE**

Hardy to Zone 6

Evergreen shrub with erect, leafy branches and dark green shiny leaves. New growth is bronzy red and turning bronze in winter. Fragrant June flowers followed by translucent blue berries. Grows to 6' unpruned; can be sheared lower. 1 gl. - \$13.95 (larger sizes available for pick up only)

**LONICERA PILEATA PRIVET HONEYSUCKLE**

Hardy to Zone 5

Evergreen shrub with low spreading, stiff branches, dark green leaves. Tiny fragrant cream flowers, followed by translucent purple berries. Will grow to 3'-4' high and wide; can be sheared lower. Sun or light shade, with most soils. A Great Plant Picks selection. 1 gl. - \$13.95 (larger sizes available for pick up only)

**NEW! MAHONIA AQUIFOLIUM 'COMPACTA' - OREGON GRAPE**

Hardy to Zone 6

A selected form of Oregon grape; grows to about 2 - 3 ft. tall and spreading. Dark green spiny foliage is a fine background for the bright yellow flowers in spring. Clusters of blue berries follow. Drought and deer tolerant. (pick up only) 🌿

**MAHONIA AQUIFOLIUM TALL OREGON GRAPE**

Hardy to Zone 6

Evergreen shrub with early spring yellow flowers followed by blue berries. Grows to 6'-8' and slowly spreads by underground runners. (pick up only)

**MAHONIA EURYBRACTEATA 'SOFT CARESS' MAHONIA**

Hardy to Zone 6

This hybrid mahonia has soft evergreen leaves, topped with spikes of cheerful yellow flowers fall through winter. A mounded form growing to 3' high and wide in time. Best in part sun to full shade, with rich moist soil, and protected from severe NE winter winds. (pick up only)

**MAHONIA X MEDIA 'CHARITY' HYBRID MAHONIA**

Hardy to Zone 7

Bold evergreen shrubs growing to 8'-10' in time. Vertical stems hold horizontal branches with spikes of fragrant yellow flowers in winter. Overwintering hummingbirds love November-December flowers. Deer resistant! A Great Plant Picks selection. 2 gl. - \$24.95 (larger sizes available for pick up only)

**MAHONIA NERVOSA LOW OREGON GRAPE**

Hardy to Zone 6

Evergreen groundcover growing to 18". Spreads by underground runners. Winter flowers of yellow, blue berries in summer. Shade to partial shade, humusy soil. A Great Plant Picks selection. 4" pots - \$3.95 🌿

Mahonia Charity

**MORELLA CALIFORNICA PACIFIC WAX MYRTLE**

Hardy to Zone 7

(Previously 'Myrica') Coastal area native evergreen shrub. In sheltered areas, grows to 20'-30'; much smaller in windy sites. Drought, salt, and deer tolerant. A Great Plant Picks selection. 1 gl. - \$16.95 (larger sizes available for pick up only) 🌍

**NANDINA DOMESTICA 'BURGUNDY WINE' HEAVENLY BAMBOO**

Hardy to Zone 6

A compact heavenly bamboo noted for its deep wine-red new foliage, contrasting with the older green foliage. The foliage turns red-orange in fall. White flowers in spring are followed by small white berries. Grows to 3'-4' tall and 2'-3' wide. 2 gl. - \$32.95

**OSMANTHUS X BURKWOODII FRAGRANT OSMANTHUS**

Hardy to Zone 7

Good hedge plant. Grows to 6'-8' high and is easily pruned. Intensely fragrant white flowers in early spring. Sun or shade, tolerant of most soils. (pick up only)

**PIERIS JAPONICA PIERIS**

Hardy to Zone 6

Evergreen shrubs with early spring bell-like flowers and colorful new foliage. Deer resistant! 2 gl. - \$29.95 (larger sizes available for pick up only)

- **KATSURA** Sprays of rose-pink, bell-shaped flowers bloom in early spring followed by emerging foliage of burgundy red, which matures to deep green by midsummer. Growing to 5' high and wide in 10-15 years.
- **MOUNTAIN FIRE** White flowers followed by intensely orange-red new foliage that holds its color into summer. Grows to 4'-5'.

- **PRELUDE** Dwarf form, beautiful, deep green foliage with pink buds open to sprays of white bell-like flowers followed by new pinkish-red foliage. Slow-growing to 2' high and wide.

**PROSTANTHERA CUNEATEA ALPINE BUSH MINT**

Hardy to Zone 7

Evergreen shrub with aromatic, deep green, tiny foliage. Grows to 2'-3' high and wide. The summer flowers are white tubular bells with purplish throats. Drought tolerant and deer resistant. 1 gl. - \$16.95

**SARCOCOCCA SWEET BOX**

Winter- to early spring-blooming evergreen shrubs for shade to part shade, rich soil, and average water.

• **CONFUSA**

Hardy to Zone 6 Glossy evergreen leaves adorned by early spring flowers of fragrant white, followed by black fruit. Slow growing to 4'-6' high and wide. 2 gl. - \$29.95

**VACCINIUM OVATUM EVERGREEN HUCKLEBERRY** 🌍

Hardy to Zone 6

Produces a multitude of white or pinkish bell-shaped blossoms in April and May, and tasty blue-black berries in August and September. Prefers a shady environment but can take full sun in cooler areas. Erect shrub grows 8'-10' in partial shade, 4'-5' in full sun. Prefers acid soil and mulched roots. 1 gl. - \$16.95

**VIBURNUM TINUS 'COMPACTA' LAURUSTINUS VIBURNUM**

Hardy to Zone 7

Deep green leaves are adorned by fragrant white flowers opening from pink buds. Excellent hedge plant and deer resistant. Best in full sun to dappled shade. Grows to 6'-8' high and wide in time. A Great Plant Picks selection. 1 gl - \$15.95 (larger sizes available for pick up)

Arctostaphylos columbiana - Hairy Manzanita

Daphne odora 'Mae-jima' - Variegated Daphne

# conifers

Conifers add year-round interest to the garden with a variety of color, texture, and form. We give approximate sizes and growth rates for conifers in our maritime climate—they may grow differently outside the PNW.

How big will it get? This is a common question from conifer shoppers. There is no hard and fast answer because conifers continue to grow as long as they are alive—and they can live a very long time. Size can also vary due to cultural conditions.

Cedrus deodara - Feeling Blue Cedar

**ABIES BALSAMEA 'NANA'** DWARF BALSAM FIR

Hardy to Zone 3

(Dwarf) Deep-green needles densely clothe this wider-than-tall conifer. Slow growing, it will reach 15" high, 18" wide as a ten-year-old plant. 1 gl. - \$19.95

**ABIES KOREANA** KOREAN FIR

Hardy to Zone 5

Korean Fir has many cultivars, from miniature to large, from silvery to blue-green to deep green. All thrive in sun.

- **BLAUER ESKIMO (Miniature)** A flattened-globe form of Korean Fir with blue-green needles. Grows less than 2" per year. Best color in full sun. 1 gl. - \$34.95 (larger sizes available for pick up)
- **OBERON (Dwarf)** Irregular, mounding shape, growing 2"–3" per year. Named for Shakespeare's King of Fairyland in honor of its regal but dwarf form. 10-year size 18" high, 24" wide. (pick up only)
- **SILBERPERL (Miniature)** A very dwarf, flattened-ball-shaped conifer with green needles that curve upward and show their silvery undersides. Grows ½" per year. (pick up only)
- **SILBER MAVERS (Miniature)** A very dwarf, globe-shaped conifer with dark green needles that curve upward to show their silvery undersides. Grows ½" per year. A great rockery or trough conifer. Full sun, well-drained soil. (pick up only)
- **STARKERS DWARF (Dwarf)** (Dwarf) Dense, irregular, upright form with deep-green needles. Begins as almost prostrate, then gradually becomes upright with age. Grows 4"–6" per year. (pick up only)

**ABIES NORMANNIANA 'MUNSTERLAND'**

Hardy to Zone 4

(Dwarf) Deep green needles on a flat-topped miniature conifer. Grows 1"–2" per year; a 10-year-old plant could reach 10" tall by 24" wide. Full sun. (pick up only)

**ABIES PINSAPPO 'AUREA'** GOLDEN SPANISH PIN FIR

Hardy to Zone 6

(Intermediate) Very striking conifer with golden yellow tips on blue-gray needles. Narrow and irregular form; it will grow 6"–8" per year. Best in full sun and well-drained soil. 2 gl. - \$39.95 (larger sizes available for pick up only)

**ARAUCARIA ARAUCANA** MONKEY PUZZLE TREE

Hardy to Zone 7

(Large) A unique and interesting South-American conifer that is fast-growing once established, growing more than 12" per year. Huge cones add interest. Prefers full sun to partial shade, and deep, moist, well-drained soil. (pick up only)

**CALLITROPIS NOOTKATENSIS –ALASKAN YELLOW CEDAR**

Hardy to Zone 4 (Chamaecyparis nootkatensis) Native to the Pacific Northwest and up the coast into Alaska.

- **GLAUCA PENDULA (Intermediate)** Graceful form with bluish, slightly weeping foliage; slow growing to 30'. Grows to 8'–10' in 10 years. (pick up only)
- **SEEDLING (Intermediate)** Seedling form, plants will vary from gray-green to slightly blue-gray, and in the degree of weeping the mature tree shows. Slow growing, 8"–10" per year. 1 gl. size - \$19.95

**CEDRUS DEODARA** DEODAR CEDAR

Hardy to Zone 6 True deodar cedars are conifers that tolerate sun, drought, and deer pressure. They also tolerate most soil types and have few pest problems.

- **DEVINELY BLUE (Dwarf)** Dense blue foliage on a mounded form, growing 3"–6" per year. It eventually forms a leader, becoming a broad cone. (pick up only)
- **FEELING BLUE (Dwarf)** Powder-blue foliage shines on this prostrate cedar. It grows 3"–4" per year. 1 gl. - \$19.95 (larger sizes available for pick up only)
- **LIME GLOW (Intermediate)** Semi-dwarf in size, with a mounded pyramidal habit and lime green needles that make this cedar a standout. Growing 6"–8" per year, becoming more upright with age. (pick up only)

CATEGORY	GROWTH PER YEAR	AVERAGE SIZE AT 10 YEARS
Miniature	Less than 1"	Less than 1' in height or width
Dwarf	1" to 6"	1' to 6' in height or width
Intermediate	6"-12"	6'- 12' in height or width
Large	Greater than 12"	Greater than 12' in height or width

Chamaecyparis obtusa  
'Nana Lutea' Dwarf Golden  
Hinoki Cypress

**CHAMAECYPARIS OBTUSA HINOKI CYPRESS**

Hardy to Zone 5 Many forms of this lovely conifer are available.

- **COMPACTA** (Intermediate) Upright, pyramidal hinoki cypress having shell shaped sprays of bright green foliage. Grows 4"-6" per year. Best in well drained, rich soil, in full sun or partial shade.
- **MARIESII (Dwarf)** An upright, irregular dwarf form of Hinoki Cypress with sprays of deep green foliage flecked in cream. Grows 3"-4" per year. Best in partial shade. (pick up only)
- **NANA LUTEA (Dwarf)** This popular dwarf Hinoki Cypress has cupped, lemon-yellow-over-dark-green sprays of foliage. Slow growing, only 3"-4" per year. (pick up only)

**CHAMAECYPARIS PISIFERA 'TSUKOMO'**  
**SAWARA FALSE CYPRESS**

Hardy to Zone 4

(Miniature) A very dwarf mound of dense, soft green foliage. Grows less than 1" per year. Excellent for rock gardens and troughs. 1 gl. - \$19.95 (larger sizes available for pick up only)

**CRYPTOMERIA JAPONICA JAPANESE CEDAR**

Hardy to Zone 6

Elegant conifers with lacy foliage, good for sun or partial shade. Fairly soil-tolerant, not attractive to deer. (pick up only)

- **BLACK DRAGON (Dwarf)** Slow-growing form of Japanese Cedar, growing 4"-6" per year. The dense foliage is dark green, with lime-green new growth.
- **ELEGANS (Intermediate)** Soft, gray-green summer foliage turns bronze-purple in winter. Grows 6"-8" per year.

**JUNIPERUS COMMUNIS 'EFFUSA' COMMON JUNIPER**

Hardy to Zone 5

(Dwarf) A slow growing, prostrate mat of dark green and silvery needles. Can grow 3"-6" per year. 1 gl. - \$15.95 (larger sizes available for pick up only).

**JUNIPERUS SQUAMATA 'BLUE STAR' HIMALAYAN JUNIPER**

Hardy to Zone 5

(Dwarf) Slow-growing, mounded conifer, only growing 2"-3" per year. Steely blue needles have best color in full sun. (pick up only)

**PICEA ABIES 'REPENS' NORWAY SPRUCE**

Hardy to Zone 3

(Dwarf) Much wider than tall, this low-growing spruce holds its branches in horizontal layers. Grows about 3"-4" per year, to 1'-2' high and 4'-6' wide in 10-15 years. 1 gl. - \$19.95 (larger sizes available for pick up only)

**PICEA SITCHENSIS 'SILVERZWERG' DWARF SITKA SPRUCE**

Hardy to Zone 6

(Dwarf) A dwarf form of our native Sitka spruce. Silvery needles on a rounded globe form, growing 1"-2" per year. Full sun, average soil. (pick up only)

**PINUS BANKSIANA 'SCHOODIC' JACK PINE**

Hardy to Zone 3

(Dwarf) Beautiful dwarf prostrate pine, growing 2"-4" per year. Irregular, twisting, horizontal branches with a bonsai-like form. Full sun, well-drained soil. 2 gl. - \$34.95

Thuja plicata 'Zebrina' -  
Western Red Cedar

**PINUS CONTORTA VAR. CONTORTA SHORE PINE**

Hardy to Zone 4

(Intermediate) Our native 2 needled pine. Irregular, compact, pyramidal form, with deep green needles. Excellent pine for oriental training and pruning. Moderate growth rate, about 8"-10" per year. Full sun, tolerant of most soils. 1 gl. size - \$15.95

**PINUS MUGO 'CARSTEN'S' GOLD MUGO PINE**

Hardy to Zone 2

(Dwarf) A dense, dwarf form of mugo pine, wider than tall, growing 2"-4" per year. Lime-green in summer, becoming rich golden yellow in winter. (pick up only)

**PINUS PUMILA 'DWARF BLUE' DWARF STONE PINE**

Hardy to Zone 4

(Dwarf) Slow, mounded pine with blue needles. Irregular spreading habit, growing 3"-4" per year. (pick up only)

**PINUS SYLVESTRIS SCOTS PINE**

Hardy to Zone 3

- **ALBYNS** One of the best groundcover pines, low and creeping, with deep blue-green needles. The color is retained even in winter. Grows 6"-8" per year.
- **HILLSIDE CREEPER (Intermediate)** Another great creeping groundcover pine with bright green needles, turning almost chartreuse in winter. Grows 8"-12" per year. (pick up only)

**PINUS THUNBERGII 'THUNDERHEAD' JAPANESE**

**BLACK PINE** Hardy to Zone 5

(Intermediate) Dark green needles contrast with white candles (growth tips) in winter. Its compact irregular form is wider than tall. Grows 6"-8" per year. (pick up only)

**SEQUIADENDRON GIGANTEUM GIANT REDWOOD**

Hardy to Zone 6

(Large) A fast-growing conifer, growing 18"-24" per year, eventually to 200'+. Prefers deep, well-drained, moist soil, but will tolerate some winter wetness. Full sun or partial shade. (pick up only)

**TAXUS BACCATA YEW**

Hardy to Zone 5

- **FASTIGIATA (Dwarf)** Very upright conifer, growing 6"-8" per year; can reach 15'-20' high and 4' wide. Deep green needles. A Great Plant Picks selection. (pick up only)
- **FASTIGIATA AUREA (Dwarf)** Very upright conifer, growing 6"-8" per year; old plants can reach 15'-20' high and 4' wide. Gold-tipped green needles. (pick up only)

**THUJA PLICATA WESTERN RED CEDAR**

Hardy to Zone 5

Pacific Northwest native conifer, fast-growing, tolerant of most soils, some shade, and wind. We offer several forms.

- **EXCELSA (Large)** 12"-15" per year. Holds onto its low branches. Good hedging plant. 1 gl. - \$12.95
- **SALMON RIDGE (Large)** Our local selection of the Northwest native Western Red Cedar. The original tree is on the North Fork of the Nooksack River, and has a strongly weeping form, much like an Alaskan Cedar. Fast growing, 8"-10" per year. (pick up only)
- **VIRESCENS (Large)** Almost columnar when young, broadening with age. Holds deep green color through the winter. Grows 10"-12" per year. Good hedging plant. 1 gl. - \$12.95 (larger sizes available for pick up only)

Tsuga canadensis - Betty Rose Hemlock

- **ZEBRINA (Large)** Bright yellow foliage striped deep green. Pyramidal form, grows 12"–15" per year. (pick up only)

**TSUGA CANADENSIS CANADIAN HEMLOCK**

Hardy to Zone 4 Small needles, many forms; tolerant of sun or shade.

- **BENNET (Dwarf)** A semi-prostrate conifer for sun or shade. Deep green needles. Grows 4"–6" per year. (pick up only)
- **BETTY ROSE (Dwarf)** A dwarf, mounded form, slightly wider than tall, with white-tipped branches. Grows 2"–3" per year. Sun to partial shade. (pick up only)
- **COLE'S PROSTRATE (Dwarf)** A wonderful hemlock for the rockery, grows 3"–4" per year, perfectly flat to the ground. (pick up only)
- **EVERITT GOLDEN (Dwarf)** Spreading at first, and then becoming upright, this golden-foliaged hemlock is a very colorful accent plant. Grows 4"–6" per year. (pick up only)
- **FREMDII (Dwarf)** This hemlock is taller than wide, growing 4" or more per year. Ascending branches have dense, deep-green needles. 1 gl. - \$19.95 (larger sizes available for pick up only)

- **GENEVA (Intermediate)** A compact, upright little tree that is happy in full sun or partial shade. Irregular form growing 8"–10" per year. (pick up only)

- **LITTLE JOE (Miniature)** Spreading at first, and then becoming upright, this golden-foliaged hemlock is a very colorful accent plant. Grows 4"–6" per year. (pick up only)

- **NANA GRACILIS (Dwarf)** Mounded form, growing 3"–4" per year. Small green needles have a silvery cast.

**TSUGA MERTENSIANA - MOUNTAIN HEMLOCK**

Hardy to Zone 5

- **BUMP'S BLUE (Intermediate)** Selected form of PNW native conifer, with very blue needles. Broad pyramidal shape, grows 6"–8" per year. 1 gl. - \$24.95
- **SHERWOOD COMPACT (Dwarf)** Selected form of PNW native conifer, with very blue needles. Broad pyramidal shape, grows 6"–8" per year. 1 gl. - \$24.95
- **SEEDLING (Intermediate)** The rather small needles are blue-green with a silver cast. Perfect for a small native garden. Very hardy, no problem with cold winds. 6' in 10 years. (pick up only) 🌍

## climbing vines

Clematis x Roguchi - Bell Clematis

**AKEBIA QUINATA PURPLE FORM CHOCOLATE VINE**

Hardy to Zone 5

Semi-evergreen vine with lacy foliage and deep-purple flowers that smell like chocolate. If strains of Akebia are planted, it may set an ugly but edible fruit. (pick up only)

**CLEMATIS**

- **ARMANDII APPLE BLOSSOM** Hardy to Zone 7  
This vigorous, evergreen clematis vine grows to 15'–20' or more. Very fragrant pink flushed, white flowers bloom early-to-mid spring. Full sun to part shade, in rich, moist, well-drained soil. Can be pruned yearly, immediately after flowering. Protect from NE winter winds. A Great Plant Picks selection. 1 gl. - \$21.95
- **MONTANA ELIZABETH** Hardy to Zone 5  
Vigorous vine covered with a profusion of 3-inch pink flowers in late spring. This cultivar is the most fragrant of all the montanas, with a sweet vanilla scent. The new foliage emerges bronze and changes to green in early summer. Can eventually reach 40'. Blooms on new wood; prune immediately after flowering. 1 gl. - \$16.95
- **VITICELLA POLISH SPIRITS** Hardy to Zone 4  
Prolific summer blooms of deep purple midsummer into fall. Can reach 10'–12'. Prune in late fall or early spring. Established plants can be cut back to 12". (pick up only)
- **ROGUCHI** Hardy to Zone 4  
Hummer magnet! Nodding, dark purple-blue flowers. 1 1/2–2" long, 1" in diameter. Blooms June–September. This variety is a hybrid of Cl. integrifolia x Cl. reticulata. Ht. 5–6'. Prune to lowest strong buds each spring. 1 gl. - \$16.95 (larger sizes available for pick up only)

**HYDRANGEA ANOMALA PETIOLARIS CLIMBING**

**HYDRANGEA** Hardy to Zone 4

The foliage and rich, coppery brown branch pattern are enough to recommend this plant. Flat white lace-cap flowers. Sun to shade, moist soil. Clings without a trellis. A Great Plant Picks selection. Hardy to Zone 4. 1 gl. - \$19.95

**LONICERA PERICLYMENUM VAR. SEROTINA LATE DUTCH**

**HONEYSUCKLE** Hardy to Zone 5

Moderately vigorous vine grows to 15'. Long lasting display of bicolor creamy white and reddish-pink flowers are extremely fragrant. The deciduous foliage is green suffused with purple. 1 gl. - \$19.95

**PARTHENOCISSUS HENRYANA SILVERVEIN CREEPER**

Hardy to Zone 6

A superb vine for sun or shade, with five lobed leaves of dark green, veined with silver. The foliage turns brilliant scarlet red in autumn. Self-clinging on wood or bark. 1 gl. - \$18.95

**WISTERIA FLORIBUNDA 'TEXAS PURPLE'**

Hardy to Zone 5

Very large, showy clusters of fragrant bluish-purple flowers. Vigorous vine, growing up to 12' per year. 25'–30' at maturity. Best in sun. 1 gl. - \$23.95

# perennials & herbs

Arenaria montana  
'Lemon Ice' Sandwort

**AGAVE PARRYI VAR. PARRYI AGAVE**

Hardy to Zone 6

Cold hardy and moisture tolerant. Compact, globous, rosettes growing to 2' high and wide. Plant in full sun, sharply drained soil. 1 gl. - \$14.95

**ALLIUM ACUMINATA HOOKER'S ONION**

Hardy to Zone 4

One of our native alliums, Hooker's Onion blooms in late spring to early summer with clusters of bright rose-purple flowers. Can reach up to 12" tall. Best in full sun. Deer resistant and very attractive to butterflies. Drought tolerant, will go dormant after blooming. 4" pots- \$6.95

**ARENARIA MONTANA 'LEMON ICE' SANDWORT**

Hardy to Zone 5

Alpine or rock garden plant that forms a low evergreen cushion of grey-green leaves, bearing loads of bright yellow buds that open to large, pale lemon-yellow flowers during the spring months. In sandy soils, this will root and spread slowly to form a patch. Drought tolerant. 4" pot - \$3.95

**ARMERIA JUNIPERFOLIA DWARF SEA THRIFT**

Hardy to Zone 2

Evergreen grass-like mound, to 3", topped in early spring with globes of pink flowers on short stems. Shear for summer rebloom. Sun, well-drained soil. Good rockery plant. 4" pots - \$3.50

**BLECHNUM PENNA-MARINA ALPINE WATER FERN**

Hardy to Zone 6

Evergreen fronds emerge bronze tinged, can grow 4"-6" high, slowly spreading to form mats. Best in full to partial shade in rich, moist humusy soil. A great groundcover. 6" pots - \$11.95

**BLECHNUM SPICANT DEER FERN**

Hardy to Zone 5

Pacific Northwest Native fern with evergreen fronds that grow 18"-30" high and wide. Best in full to part shade in rich, moist soil. 1 gl. - \$12.95

**BRODIAEA CORORNARIA CROWN BRADIAEA**

Hardy to Zone 7

Native bulb, this member of the lily family starts blooming in late spring or early summer as the soil starts to dry out. Violet-blue upright vase-shaped flowers can grow to 6"-10" above the basal leaves. Goes dormant after flowering. Best in full sun. 4" pot- \$6.95

**CAMAS LEICHTLINII GREATER CAMAS**

Hardy to Zone 4

Pacific Northwest Native bulb, blooming in mid-spring with spikes of blue flowers. Tolerates winter-wet soil, also does well in ordinary garden soil. Will self-seed if happy. Full sun. 6" pots - \$10.95

Camas Leichtlinii -  
Greater Camas

**CAMPANULA PORTENSCHLAGIANA DALMATION**

**BELLFLOWER** Hardy to Zone 3

Low, evergreen to semi-evergreen creeping mat is topped late spring by cheerful blue bells. Shear for repeat bloom. Will self-seed a bit. Sun or shade, low water use. 4" pots - \$3.95

**DICENTRA FORMOSA PACIFIC BLEEDING HEART**

Hardy to Zone 4

Finely cut foliage is topped early to late spring with pinkish-purple, drooping flowers. Spreads by rhizomes. Prefers shade to part shade. 4" pots - \$3.95

**DRYAS OCTAPETALA MOUNTAIN AVENS**

Hardy to Zone 3

Native to Western mountain ranges, this low-growing, mat-forming, semi-evergreen plant blooms in mid-spring with striking single white flowers followed by silky seed heads. Prefers full sun and well-drained soils. 4" pots - \$4.95

**EPIMEDIUM X PERR. 'FROHNLEITEN' BARRENWORT**

Hardy to Zone 4

Evergreen foliage marbled in bronze, with bright-yellow spring flowers. Slowly spreads to form large clumps. Part shade, average soil. 4" - \$7.95, 6" - \$12.95

**FRAGARIA CHILOENSIS COASTAL STRAWBERRY**

Hardy to Zone 5

Northwest native strawberry with semi-evergreen, glossy, leathery leaves. White flowers are sometimes followed by tiny strawberries. Full sun, well-drained soils. 4" pots - \$3.95

**FRITILLARIA AFFINIS (LANCEOLATA) CHOCOLATE LILY**

Hardy to Zone 5

PNW Native wildflower, chocolate-maroon bells bloom early spring. Grows to 6"-8" high. Sun to part shade, spring moist, summer dry soil. 4" pots - \$6.95

**FUCHSIA MAGELLANICA HARDY FUCHSIA**

Hardy to Zone 7

Evergreen foliage marbled in bronze, with bright-yellow spring flowers. Slowly spreads to form large clumps. Part shade, average soil. 4" - \$7.95, 6" - \$12.95

- **ELEANOR RAWLINGS** Flowers have long red-purple sepals and violet corollas, blooming June till frost. Bold rounded foliage on a low growing plant, to 2' high, 3' wide.
- **GENII** Blooms with purple-blue corollas and red sepals grace this chartreuse-foliaged variety. Upright form to 3'.
- **LECHLADE MAGICIAN** A vigorous, upright hardy fuchsia with lavender flowers accented by purple corolla. Does well in part shade to full sun. Can reach 4'-5' when established.
- **MOLINAE** Small, narrow, delicate, palest pink flowers are prolific and long blooming on this upright hardy shrub. Cut back early spring. Part shade, moist soil. To 4'.
- **TOM THUMB** A very hardy small fuchsia with upright habit, growing to 2.5' high and wide. From late spring to frost, small flowers bloom, with deep purple and tubes and mauve pink corollas.

**LAVENDULA SPECIES LAVENDER**

Hardy to Zone 5

Evergreen shrubby herb with fragrant gray foliage and wands of flowers in summer. Drought tolerant. Full sun, well-drained soil. 4" pots - \$4.95

- **ANGUSTIFOLIUM HIDCOTE** Deep purple-blue spikes bloom over a long period in summer. Fragrant foliage is soft gray-green. Full sun, well-drained soil. Grows to 12" high & wide. 2.5' high and wide.

Origanum x Kent Beauty -  
Flowering Oregano

- **INTERMEDIA GROSSO** Long, deep purple-blue spikes bloom over a long period in summer. Very fragrant. Grows to 24" high and wide.

**LEWISIA COTYLEDON LEWISIA**

Hardy to Zone 3

Evergreen rosettes bloom in shades of white, or pink to salmon. Prefers very good drainage in sun to partial shade; best with gravel mulch. 4" pots- \$5.95

**MENTHA SPICATA VAR. CRISPA 'MORACCAN' SPEARMINT**

Hardy to Zone 5

The best spearmint for tea and culinary uses. This mint is compact and grows to 24" high and wide. Full sun to partial shade. Will spread by runners. Can be grown in a pot to restrict spreading. 1 gl. - \$9.95

**MENTHA X VILLOSA – MOJITO MINT**

Hardy to Zone 5

The classic mint in Cuban beverages, aromatic with sweet undertones. Grows to 24" high and wide. Full sun to partial shade. Will spread by runners. 1 gl. - \$9.95

**NEPETA X FAASSENII 'WALKER'S LOW' CATMINT**

Hardy to Zone 3

Small gray green fragrant leaves form wide mounds 12" high, 18" wide. Masses of lavender-blue flowers are borne on spikes in early summer. Cut back spent flowers for repeat bloom. Full sun, well-drained soil. Loved by bumblebees. Deer resistant and drought tolerant. 1 gl. - \$9.95

**PENSTEMON DAVIDSONII DAVID'S PENSTEMON**

Hardy to Zone 4

Evergreen mat-forming shrubby penstemon, with trumpet-shaped pink to violet flowers in spring. Grows to 3"-4" high, spreads to 12" wide. Full sun, well-drained soil. Loved by hummingbirds and bumblebees. 4" pots- \$4.95

**PENSTEMON PINIFOLIUS PINE LEAVED PENSTEMON**

Hardy to Zone 4

Fine, needle-like foliage, grows to 10"-12". Warm-red, narrow trumpet-like flowers in early summer, attractive to hummingbirds. Drought tolerant, well-drained soils, full sun. 4" pots- \$3.95

**PENSTEMON X CANDY WINE BEARDTONGUE**

Hardy to Zone 7

Growing to 3' tall & 2' wide, this vigorous penstemon blooms late-summer to frost with white throated, coral-red tubular bells that attract hummingbirds and bumblebees. Full sun, average to dry soil. 6" pots- \$10.95

**PEROVSKIA ATRIPLICIFOLIA RUSSIAN SAGE**

Hardy to Zone 4

Tall spikes of smoky blue flowers bloom mid-to-late summer above silvery foliage. Grows to 3'-4' high, 2'-3' wide. full sun. Drought tolerant, deer resistant. 6" pots- \$10.95

**PHYGELIUS X RECTUS CAPE FUCHSIA**

Hardy to Zone 7

A deciduous to semi-evergreen shrub, often grown as a perennial. These drought-tolerant plants bloom from midsummer almost until frost and are very attractive to hummingbirds. Deer resistant. Spreads by suckers. 6" pots- \$10.95

- **CHERRY RIPE** Bright red tubular flowers with yellow throats bloom on plants growing 2'-3' tall.

- **CORAL PRINCESS** Salmon-colored tubular flowers with a hint of soft yellow in the throats in summer.

- **MOONRAKER** Tubular flowers of pale yellow bloom atop 4'-5' plants in summer.

**POLYSTICHUM MINUTUM SWORD FERN**

Hardy to Zone 6

Pacific Northwest native evergreen fern, growing to 2'-3'. Prefers shade to part shade, but can take considerable sun once established. Tolerant of dry shade under large conifers. 1 gl. - \$12.95

**ORIGANUM VULGARE 'HOT & SPICY' OREGANO**

Hardy to Zone 4

Culinary oregano with a strong, pleasantly spicy flavor. Harvest leaves before flowers appear, cut back after flowering. Grows to 12"-20" high. Full sun, lean soil, drought tolerant. 1 gl. - \$9.95

**ORIGANUM X 'KENT BEAUTY' FLOWERING OREGANO**

Hardy to Zone 6

Wonderful rock garden oregano, blooming mid-summer till frost, with large bracted flowers of shrimp pink. Full sun, sharply drained soil, low water use. 4" pots- \$4.95

**SALVIA X SYLVESTRIS 'CARADONNA' FLOWERING SAGE**

Hardy to Zone 5

Violet-blue flowers throughout summer (and fall if cut back monthly). This variety is noted for its striking dark stems. Full sun, average soil, 18"-24". 6" pots- \$10.95

**SALVIA OFFICINALIS 'BERGGARTEN' CULINARY SAGE**

Hardy to Zone 4

Low-growing, broad-leaved form of edible sage. This select strain has large leaves and wonderful flavor. Spikes of blue flowers early summer. Sun, well-drained soil. Drought tolerant, deer resistant, and pollinator attractant. 6" pots- \$10.95

**SEDUM OREGONENSE 'MCKENZIE RIVER FORM' STONECROP**

Hardy to Zone 2

A selected form of our native Oregon stonecrop, from the McKenzie River Pass in central Oregon. Leaves are more blue than normal. Native to rocky crevices in full sun to part shade. Excellent for rock garden. To only 2" tall and forming small colonies. In late spring golden yellow flowers appear from elongated stems. 4" pots - \$4.95

**SEDUM TELEPHIUM 'AUTUMN JOY' STONECROP**

Hardy to Zone 2

Upright, fleshy perennial to 30". Blue-green succulent leaves grow in tall clumps and are topped in late summer by flat flower clusters of deep coppery-pink that age to brownish seed heads. Attractive to bees and butterflies. 6" pots- \$9.95

**SEDUM SPATHIFOLIUM 'CARNEA' STONECROP**

Hardy to Zone 5

Evergreen, silvery-white rosettes of fleshy leaves take on a red tones in winter. Yellow flowers in July. Full sun, needs well-drained soil. Drought tolerant. Selection of a PNW native. 4" pots - \$3.95

**SEMPERVIVUM ARACHNOIDEUM 'BARONESSE'**

Hardy to Zone 4

Evergreen succulent rosettes with olive green leaves backed in red. Fine webbing covers the rosettes. Best in sun to part shade, well-drained soil. Drought tolerant once established. 4" pots - \$3.95

Penstemon davidsonii -  
David's Penstemon

Zauchneria x Select Mattole  
-California Fuchsia

**THYMUS VULGARIS ENGLISH THYME**

Hardy to Zone 4

Small evergreen shrub whose leaves are the culinary thyme so common in the kitchen. Grows to 15" high, 10"-12" wide. Full sun, well-drained soil. 4" pots - \$3.95, 1 gl. - \$9.95

**THYMUS X 'LIME' THYME**

Hardy to Zone 5

Small evergreen perennial/shrub whose leaves are much like the culinary thyme so common in the kitchen, but with a hint of citrus. Lime green foliage makes this a standout in the garden. Grows to 15" high, 10"-12" wide. Full sun, well-drained soil. 1 gl. - \$9.95

**VANCOUVERIA HEXANDRA INSIDE OUT FLOWER**

Hardy to Zone 4

Northwest native woodland plant, with delicate foliage and sprays of white flowers in late spring. Slowly spreads to form colonies. Shade to partial shade, rich soil. 1 gl. - \$12.95

**ZAUSCHNERIA SEPTENTRIONALIS 'SELECT MATTOLE' CALIFORNIA FUCHSIA**

Hardy to Zone 4

(Epilobium) Silvery leaves contrast with the deep orange-red fuchsia-like flowers that bloom from July through September. Low mounds spread slowly on this drought-tolerant, sun-loving plant. 1 gl. - \$10.95

# deciduous shrubs

**AMELANCHIER GRANDIFLORA 'AUTUMN BRILLIANCE' SERVICEBERRY**

Hardy to Zone 4

A spreading shrub with graceful branch patterns, prolific spring bloom, and excellent, reliable fall color. Berries are attractive to birds. Tolerant of most soils. 18"-24" Bare root - \$23.95

**AMELANCHIER ALNIFOLIA WESTERN SERVICEBERRY**

Hardy to Zone 3

Deciduous shrub with prolific white flowers in late spring. Large, blueberry-like fruits ripen late June to early July. Matures at 10'-12'. Tolerant of most soils. Best fruiting in full sun, also good in partial shade. (pick up only)

**AZALEA**

Hardy to Zone 5

Deciduous shrubs that bear bright, fragrant flowers in late spring. Good in sun or shade and average soil. (pick up only)

- **GIBRALTER** Brilliant orange-flushed red flowers held in a tight ball truss. Compact habit, maturing at 4'-5'. Good mildew resistance.
- **LEMON LIGHTS** Matures at 4'. Soft, lemon-yellow flowers are lightly fragrant. The deep-green foliage is very disease resistant. Fall colors range from red to purple.
- **ROSY LIGHTS** Very hardy, deciduous azalea. Matures at 4' high. Dark, rosy-pink blossoms are sweetly fragrant. The foliage is disease resistant, and takes on fall tones of gold and orange.
- **WHITE LIGHTS** Ruffled, white blossoms have a yellow band on the upper lobe and are sweetly fragrant. Foliage is disease resistant, with good fall tones of gold and orange. Grows to 4'.

**BERBERIS THUNBERGII 'HELMOND PILLAR' BARBERRY**

Hardy to Zone 5

Deciduous, columnar shrub growing to 6' high, 1' wide, with deep-purple foliage. Tiny yellow flowers are fragrant, with red berries in fall as the leaf color intensifies to crimson. Deer leave it alone! Tolerant of most soils, and drought tolerant. (pick up only)

**CALLICARPA BODNERI 'PROFUSION' BEAUTYBERRY**

Hardy to Zone 5

Upright deciduous shrub, growing to 8'-10'. Pale-pink midsummer flowers are followed in fall by deep-violet fruit. Fall foliage of red and maroon. A Great Plant Picks selection. 1 gl. - \$12.95; (larger sizes available for pick up)

**CORNUS SERICEA 'BLOOD ORANGE' REDTWIG DOGWOOD**

Hardy to Zone 4

Colorful twigs are yellow at the base and grade into red at the tips. Striking for winter color! Grows to 4'-5'. Green summer foliage turns shades of yellow to red in fall. Tolerant of both wet and dry soil. Prune out oldest wood to maintain twig color. 18"-24" Bare root - \$18.95

**CORYLOPSIS PAUCIFLORA BUTTERCUP WINTERHAZEL**

Hardy to Zone 6

Deciduous shrub with horizontal branching, growing to 4'-6' in height and width. Late winter blooms of soft yellow are quite fragrant. The green leaves emerge after the bloom. Sun to full shade, moist, well-drained soil. A Great Plant Picks selection. (pick up only)

**COTINUS COGGYGRIA SMOKE BUSH**

Hardy to Zone 5

Large deciduous shrubs, eventually to 15' but can be kept smaller with pruning. Colorful foliage and airy flower plumes are attractive. Somewhat deer and drought resistant. (pick up only)

- **GOLDEN SPIRIT** Brilliant golden-yellow leaves in sun, bright chartreuse when grown in shade, with fall tones of gold, coral, orange and red. Pink-flushed cream flower plumes.
- **GRACE** Large oval leaves emerge steel blue and darken to deep purple in summer. The foliage turns brilliant orange and red in fall. Large plumes of pink flowers borne in summer.
- **OLD FASHIONED** Large, bluish green foliage emerges flushed pink and purple. Early summer bloom of pale, smoky-pink plumes. Fall colors are a blend of pink, orange, and red.

Deciduous azalea  
White Lights foreground,  
Rosy Lights background

**DAPHNE X TRANSLANTICA 'BLAFRA' ETERNAL FRAGRANCE DAPHNE**

Hardy to Zone 6

Semi-evergreen to deciduous daphne growing to 3' high and wide. In spring, the sweetly fragrant flowers begin—pink flushed white—and continue sporadically through the summer. Sun to light shade, well-drained soil. (pick up only)

**DIERVILLA RIVULARIS BUSH HONEYSUCKLE**

Hardy to Zone 4

Compact deciduous shrubs grown for their colorful foliage and long season of honeysuckle-like flowers that attract bees and butterflies. Drought and deer resistant. (pick up only)

- **HONEYBEE** Low growing to 3' tall, 4' wide with brilliant yellow foliage. Yellow flowers most of the summer.
- **TROJA BLACK** Foliage emerges burgundy-bronze and matures to deep green in summer. A long summer season of bright yellow honeysuckle-like flowers. Grows to 4' tall, 5' wide.

**EDGEWORTHIA CHRYSANTHA 'GRANDIFLORA' PAPERBUSH**

Hardy to Zone 7

Very fragrant yellow, daphne-like flowers bloom over a long period in February and March. Tropical-looking foliage on striking stems give the plant an exotic summer look. Best flowering in a warm site. (pick up only)

**ENKIANTHUS CAMPANULATUS REDVEIN ENKIANTHUS**

Hardy to Zone 6

A beautiful shrub grown for its spectacular fall colors of yellow, orange, and red. Bell-like May flowers are large, creamy-bronze with red veining. Picturesque in habit, it may reach 8' in time. Sun or partial shade, and rich, acidic soil. (pick up only)

**FORSYTHIA X 'NORTHERN GOLD' FORSYTHIA**

Hardy to Zone 3

Deciduous shrub with arching upright branches that bear golden-yellow, bell-shaped flowers in late winter to early spring. Grows to 8'. Best in full sun, tolerant of most soils, usually ignored by deer. (pick up only)

**FOTHERGILLA X INTERMEDIA 'MT. AIRY' FOTHERGILLA**

Hardy to Zone 5

A selected form of fothergilla, with a vigorous, upright habit, growing to 5'. The deep-green summer foliage takes on tones of gold, orange, and red in autumn. A Great Plant Picks selection. (pick up only)

**HEPTACODIUM MICINOIDES SEVEN SON FLOWER**

Hardy to Zone 5

A bold deciduous shrub prized for its ornamental peeling bark and intensely fragrant autumn flowers that are a boon to pollinators. Can grow to 15' but easily kept smaller with pruning. Best in sun or partial shade, well-drained soil with ample summer water. A Great Plant Picks selection. 1 gl. - \$15.95, (larger sizes available for pick up)

**HOLODISCUS DISCOLOR OCEAN SPRAY**

Hardy to Zone 6

PNW native deciduous shrub, with June flowers of creamy white. Grows to 10'–12'. Best in sun to part shade. Tolerant of most soil types, and tolerates drought once established. 1 gl. - \$14.95, (larger sizes available for pick up)

**LONICERA INVOLUCRATA BLACK TWINBERRY**

Hardy to Zone 4

PNW native shrub with yellow spring flowers followed by black berries. Excellent bird-habitat plant. Moist to wet soils, sun to part shade. Grows to 8'. 1 gl. - \$12.95

# hydrangeas

A group of woody shrubs unequalled for summer bloom. Most will tolerate full sun in the Northwest if summer irrigated, and all will thrive in shade to partial shade.

Hydrangea macrophylla  
'Glowing Embers'

- Varieties native to PNW

**HYDRANGEA MACROPHYLLA BIGLEAF HYDRANGEA**

Hardy to Zone 5

• **NIKKO BLUE**

A classic hydrangea cultivar, growing to 6' high and up to 8' wide. Long summer bloom of blue mophead flowers in acid soils, pink in alkaline—great as cut flowers. (pick up only)

- **KINGFISHER ('TELLER EISVOGEL')** The lacecap flowers are formed from large petals—blue or violet in acidic soils, fuchsia-pink in alkaline soils. Grows to 4'–6'. 1 gl. - \$16.95

- **PINK BEAUTY** Summer bloom of dark pink lacecaps over large foliage touched in pink. Fall foliage color of deep wine red. Grows to 4'–6'. 1 gl. - \$16.95

- **GLOWING EMBERS** Large heads of reddish pink. A vigorous cultivar for sun or shade, grows to 4'. Flowers on wood produced the previous year. A Great Plant Picks selection. 1 gl. - \$16.95

**HYDRANGEA QUERCIFOLIA SIKE'S DWARF OAKLEAF**

HYDRANGEA Hardy to Zone 4

Conical flowers of ivory white appear late summer into fall. Oak-shaped leaves turn burgundy-red in autumn. Grows to 3' high and wide. 1 gl. - \$16.95, (larger sizes available for pick up)

**HYDRANGEA PANICULATA 'WHITE MOTH' HYDRANGEA**

Hardy to Zone 4

Huge conical flowers of pure white fading to pale green, blooms from mid-July until late September. Great cut flowers. Blooms on new wood. Grows to 8'–10' or more unpruned. 1 gl. - \$16.95

**PHILADELPHUS LEWISII 'BLIZZARD' MOCK ORANGE**

Hardy to Zone 5

Selected form of our native mock orange. More compact than seedling mock orange, growing to 6' with prolific June bloom of very fragrant white flowers. Sun to partial shade, drought tolerant once established. 1 gl. - \$12.95, (larger sizes available for pick up)

Ribes sanguineum 'Kling Edward' - Flowering Currant

**PHYSOCARPUS CAPITATUS WESTERN NINE BARK**

Hardy to Zone 3

Arching stems are treasured for their peeling brown and tan bark. The white flower clusters appear in late spring, followed by seed heads that attract songbirds. Not fussy about light or soil. Grows to 8'. 1 gl. - \$12.95; (larger sizes available for pick up) 🌱

**POTENTILLA FRUTICOSA SHRUBBY CINQUEFOIL**

Hardy to Zone 2 Selected forms of a native shrub with silvery leaves. Drought and deer resistant. 🌱

- **KATHERINE DYKES** The bright lemon-yellow flowers bloom midsummer through to frost. Grows to 2'-3' high and wide. (pick up only)
- **PRIMROSE BEAUTY** A deciduous shrub with silvery leaves, growing to 2'-3' high, wider than tall. The cheerful pale-yellow flowers bloom midsummer through to frost. 1 gl. - \$12.95
- **SNOWFLAKE** The pure white flowers bloom midsummer through to frost. Grows to 3' high and wide. 1 gl. - \$12.95

**OEMLERIA CERASIFORMUS INDIAN PLUM**

Hardy to Zone 6

This mid-sized deciduous native shrub signals the end of winter with clusters of small drooping white flowers, followed by a small bittersweet plum-like fruit that is attractive to wildlife. Best in part shade. Can reach 15' in time. (pick up only) 🌱

**RIBES SANGUINEUM 'KING EDWARD' FLOWERING CURRANT**

Hardy to Zone 6

Selected form of our native flowering currant with deep reddish pink flowers, a little later than the species. Early spring blooms welcome hummingbirds, followed by berries favored by songbirds. Partial sun, well-drained soils, deer resistant. Compact form to 6'. A Great Plant Picks selection. 1 gl. - \$14.95, (larger sizes available for pick up) 🌱

**ROSA RUGOSA HYBRID 'LINDA CAMPBELL' RUGOSA ROSE**

Hardy to Zone 4

Hybrid rugosa roses are tough performers in the garden, with long bloom seasons and good drought tolerance. Upright growing with lightly fragrant, deep-red flowers blooming throughout the summer. Grows to 6'. (pick up only) 🌱

**SALIX WILLOWS**

Shrubby willows are known for their tolerance of winter wet soils. Their late winter to early spring blooms are an important food source for pollinating insects when little else is in bloom.

- **SACHALINENSIS SEKKA (JAPANESE FANTAIL WILLOW)** Hardy to Zone 5 A vigorous deciduous shrub grown for its curved and twisting, fasciated (flattened) stems that are dotted in late winter with small, silvery catkins. Can be cut to the ground annually to control size. 1 gl. - \$10.95
- **YEZOALPINA JAPANESE DWARF WILLOW** Hardy to Zone 5 A prostrate deciduous groundcover growing 6" tall and spreading to 4'-6'. Bold, purplish stems are adorned by upright, pale-yellow catkins in early spring. Round green leaves turn bright yellow in autumn. A Great Plant Picks selection. 1 gl. - \$10.95, (larger sizes available for pick up)

**SAMBUCUS NIGRA 'GERDA' BLACK BEAUTY ELDERBERRY**

Hardy to Zone 6

Deep maroon-black foliage acts as a foil to the pinkish white flowers. Its arching form can reach 15', or be pruned

hard in spring to give larger, lush foliage. Full sun gives best foliage color. A Great Plant Picks selection. 1 gl. - \$14.95

**SAMBUCUS NIGRA SSP. CAERULEA BLUE ELDERBERRY**

Hardy to Zone 5

Native deciduous shrub, with an arching form growing to 10'+. Blue berries ripen late summer, much loved by birds, great for jams and wine. Likes sun and well-drained soils. Bare root - \$13.95 🌱

**SAMBUCUS RACEMOSA 'GOLDENLOCKS' ELDERBERRY**

Hardy to Zone 3

Selected form of our native red elderberry. White flowers bloom from late summer to early fall followed by inedible red berries. Bright gold, finely dissected foliage. Dwarf habit grows to 6' tall, 4' wide. Best in full sun to partial shade, with rich, moist, well-drained soil. (pick up only) 🌱

**SPIRAEA X 'MAGIC CARPET' - SPIRAEA**

Hardy to Zone 3

A dense, low growing deciduous shrub, with coppery toned new growth changing to lime green mature leaves. Deep pink flowers bloom early to mid summer. Grows to 18"-24" high, spreads to 3'. Best in sun to partial shade.

**SYRINGA VULGARIS FRENCH LILAC**

Hardy to Zone 4 Classic deciduous shrubs grown for their wonderful, fragrant flowers. Best in full sun. Add lime to the soil to promote flowering.

- **BEAUTY OF MOSCOW** Blooms with fragrant double white flowers opening from pale pink buds. Grows to 8'-10' in 10 years. 18"-24" Bare root - \$22.95
- **CHARLES JOLY** Blooms are intensely fragrant, deep purple, and fully double. Grows to 8'-10' in 10 years. One of the best deep purples. 18"-24" Bare root - \$22.95
- **TINY DANCER** A compact form of common lilac, with violet-purple buds opening to fragrant lavender flowers. Grows to 5' high, 4' wide over time. Best in sun, with rich, moist soil. (pick up only)

**VIBURNUMS**

Hardy to Zone 6 Deciduous shrubs grown for form and flower. All are good in part shade to sun, average soils. Most are deer resistant.

- **CARLESII AURORA** Deep-pink buds opening in mid-spring to intensely fragrant pale-pink to white flowers. Fall foliage color is a blend of orange and red. Grows to 6'. (pick up only)
- **PLICATUM SUMMER SNOWFLAKE** Grown for its beautiful horizontal branching form. Late spring into summer, the branches are lined with white lacecap flowers, followed by red berries. Grows to 6'-8" high, 10' wide. Best in full sun to partial shade, with moist soil. (pick up only)

**WEIGELA FLORIDA 'WINE AND ROSES' WEIGELA**

Hardy to Zone 4

Deep-burgundy leaves highlighted by prolific deep-pink flowers in late spring. Vase-shaped shrub, growing to 4'-5' high and wide. Sun to part shade, tolerant of many soil types. 1 gl. - \$12.95, (larger sizes available for pick up)

Sambucus racemosa Goldenlocks - Golden Elderberry

Viburnum carlesii Aurora - Spice Viburnum

# rhododendrons

After the name of each rhododendron, we have listed a series of numbers. First is the average size of the plant in 10 years. Then hardiness ratings in degrees Fahrenheit. Lastly, bloom times in the Northwest as follows:

VE: Jan-April 1  
 E: April 1-May 1  
 EM: May 1-May 15  
 M: May 15-June 1  
 ML: June 1-June 15  
 L: June 15- July 1  
 VL: July 1- July 31

Our descriptions also include American Rhododendron Society (ARS) ratings when possible. The two numbers (e.g. 3/4) rate the appearance of the flower first, then the plant. 5 being excellent (an uncommon rating) and 3 being the most common (lower numbers do not mean the plant is not worth growing). '-/-' indicates the rhododendron has not yet been rated by the ARS.

- Varieties native to PNW 

Rhododendron Hoteli

**R. MACROPHYLLUM PACIFIC RHODODENDRON**

5' -5°F ML 2-3/2-3  
 Native to the Pacific coast, this open, upright rhododendron adorns the forests with clear pink flowers in May. Best in well-drained sites and partial shade. 1 gl. - \$19.95 

**BLUE BARON**

3' -10°F M -/-  
 Upright, tight growth of glossy small leaves. Prolific flowers midseason that are deep blue with a hint of purple. Sun tolerant. 2 gl. - \$32.95

**EVERRED**

2' EM 0°F -/-  
 Incredible foliage plant, with deep-purplish, black-rounded foliage on a wider-than-tall shrub. Dark-red flowers are bell-shaped in loose trusses. 2 gl. - \$32.95 (larger sizes available for pick up only)

**FANTASTICA**

3' -5°F ML 4-5/4  
 Strong rose-pink flowers fade to white in the throat, and are carried above long, elliptical leaves with furry silver undersides. 2 gl. - \$32.95

**FRED G. PESTE**

3' -10°F M -/-  
 Upright, tight growth of glossy small leaves. Prolific flowers midseason that are deep blue with a hint of purple. Sun tolerant. 2 gl. - \$32.95

**HONEY BUTTER**

4' -5°F M 4/4  
 A great rhododendron from Northwest hybridizer, Jim Barlup. The yellow-orange, bicolored flowers are held in dome-shaped trusses. 2 gl. - \$32.95

**HOTELI'**

5' F M 5/4  
 Prolific blooms of canary yellow on a rounded, dense plant. Needs good drainage. 2 gl. - \$32.95

**JEAN MARIE DE MONTAGUE**

5' -5°F M 4/4  
 Bright red flowers are prolific even on young plants. The deep-green foliage is tolerant of sun, and the plant will grow as wide as tall. 2 gl. - \$32.95

**KODIAK**

4' -5°F M -/-  
 Incredible foliage of deep green with furry brown undersides. Pure white flowers. Needs PM shade. (pick up only)

**LEMON DREAM**

3' 0°F M -/-  
 Prolific, soft yellow flowers with wavy edges and are sometimes double. The deep-green foliage is rounded in shape and emerges with cinnamon indumentum on the undersides. A Great Plant Picks selection. 2 gl. - \$32.95 (larger sizes available for pick up only)

**MARYLOU**

3' 0°F EM -/-  
 Peachy pink flowers fade to pale yellow in the throat, adorned with a red blotch. The trusses of flowers bloom over deep-green foliage on a plant that grows wider than tall. 2 gl. - \$32.95

**NANCY EVANS**

3' 5°F M 5/4  
 A rounded, dense plant with beautiful foliage. Orange-red buds open to amber yellow, then fade to golden yellow. (pick up only)

**NEON**

3' -5°F M -/-  
 Bell-shaped flowers open midseason from orange buds. Flowers are orange, fading to orange-yellow towards the center. The foliage is glossy dark green. 2 gl. - \$32.95

**OSTBO RED ELIZABETH**

3' EM 0°F 3/3-4  
 Masses of red bell-shaped flowers bloom in mid-spring, and the show continues as the new foliage emerges a deep maroon. The color holds into midsummer. Compact habit growing as wide as tall. 2 gl. - \$32.95

**PATTY BEE**

18" -10°F EM 5/4-5  
 A great dwarf rhododendron. Clear yellow flowers are carried in loose trusses above small green foliage. Very heat and sun tolerant. A Warren Berg hybrid. (pick up only)

**PERCY WISEMAN**

3' -10°F M 4/4  
 Dark-green foliage covers this wider-than-tall, compact plant. Trusses of soft peach-yellow flowers gently fade to white. 2 gl. - \$32.95

**PINK PINWHEELS**

3' 0°F M -/-  
 Bright-pink-edged white flowers cover this new hybrid by Frank Fujioka. The foliage is a nice deep green and densely covers this compact plant. (pick up only)

Rhododendron Blue Baron

Rhododendron Neon

Rhododendron Tapestry

**PJM ELITE**

4' -25°F E 4/4

Small rounded leaves are green in summer, mahogany-red in winter. The early flowers are lavender pink. The 'Compacta' form of PJM has a vigorous, compact habit, and is prolific in flower. Sun tolerant. 2 gl. - \$32.95

**POLARNACHT**

3' -10°F ML -/-

Deep green leaves cover this wider-than-tall plant. The frilled, funnel-shaped flowers are deep purple-red with a deep-red spotted dorsal lobe, held in trusses of 12-14 flowers. 2 gl. - \$32.95 (larger sizes available for pick up only)

**POMEGRANATE SPLASHED**

5' 5°F M -/-

A new hybrid with stunning flowers of purplish-red-edged white, with a spotted red dorsal flare. A strong growing plant with excellent foliage, from breeder Frank Fujioka of Whidbey Island. 2 gl. - \$32.95

Rhododendron Pomegranate Splash

**SILVER SKIES**

3' -10°F M 4/4

A great 'yak' hybrid, with long, narrow leaves of deep green, backed by silvery indumentum. The deep-pink buds open to pale-pink flowers with deep-pink margins and stripes on the outsides of the petals. (pick up only)

**SONGBIRD**

3' -5°F E-EM 3-4/4

Bright purple-blue flowers seem to glow when in bloom. Glossy green foliage growing in compact, dense habit compliment the flowers. Sun tolerant. 2 gl. - \$32.95

**TAPESTRY**

4' -20° M -/-

Low growing, wider-than-tall plant densely covered with forest-green foliage. Ball-shaped trusses of deep lavender flowers are accented by darker eyes. 2 gl. - \$32.95 (larger sizes available for pick up only)

**TEDDY BEAR**

3' 0°F EM -/-

Shiny, deep-green foliage is coated on the undersides with cinnamon-colored indumentum. Pale-pink flowers bloom in trusses, opening from deeper pink buds. 2 gl. - \$32.95

**WHISPERING ROSE**

3' 0°F EM 4/4

A very compact, mounded plant with round, green leaves, accented by red buds. The bell-like flowers are deep rose-pink. 2 gl. - \$32.95 (larger sizes available for pick up)

**WINE & ROSES**

3-4' 0°F EM -/-

A 'roseallon' hybrid, with deep-green foliage whose undersides are velvety purple-red. The early flowers are rose red. (pick up only)

# what sets the nursery at cloud mountain farm center apart?

**WE PROPAGATE AND GROW PLANTS** right here onsite. Propagation methods include growing plants from cuttings, grafting fruit trees, conifers and Japanese maples, and even growing plants from seed.

We plant both fruit and ornamental plants in trials so we can see how they perform in our climate. Our Goodwin Road site, where the nursery is located, tends to run 10°F warmer in summer than nearby Bellingham, and often we can be 10°F colder

during the coldest winter weather. We get both strong south winds off the water, and the famous Northeaster Fraser valley outflow winds. Those weather variables really test many plants.

Beyond aesthetic beauty or fruit flavor, we evaluate new fruit and ornamental plants so we can be confident they will work in local gardens. We look for disease resistance, drought tolerance, hardiness, benefits like habitat enhancement and pollinator friendliness, and deer resistance.

## growing fruit trees at cloud mountain farm center

Producing a ready-to-sell fruit trees is an 18 month process. It starts in July and August, chip bud grafting varieties to rootstock that we have grown since spring.

Fruit trees are grafted (joining a fruit variety with a chosen rootstock).

### Why grafted?

Fruit tree varieties do not grow true from seed. Fruit trees are difficult to root from cuttings. Rootstock choice can influence size, soil tolerance, and productivity.

Later in the fall, the budded trees are planted out in clean ground.

The following spring, the buds start pushing a shoot, and the top of the rootstock is cut off

The trees are staked, irrigated, fertilized and pruned several times during the summer growing season.

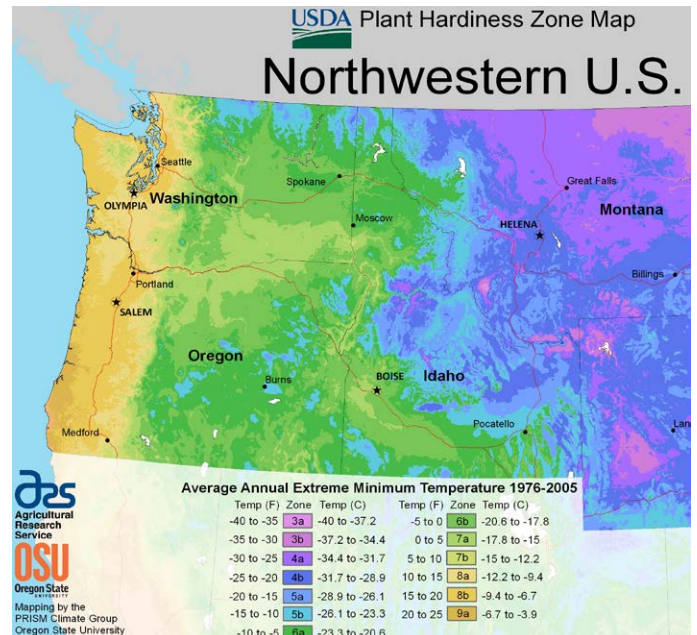

After the trees go dormant, either in winter or early spring, the trees are tagged, graded and dug from the field, ready to sell in the sales yard. A tree chip budded in August 2020 will be for sale in February 2022.

# what does 'hardy' mean?

For many plants in the catalog, we have listed how hardy the plant is. What does that mean? The USDA Hardiness Zones are based on Average Annual Extreme Minimum Temperatures. For most of Western Washington, our average extreme minimum winter temperatures are in the 10°–20°F range, putting us into USDA Hardiness Zone 8. We can get colder than 10°F, but most years we don't. These hardiness zones are only a guideline—plants that are not established may not tolerate as low a temperature as ones that are. Drought stress during the summer can also influence a plant's ability to withstand winter cold.

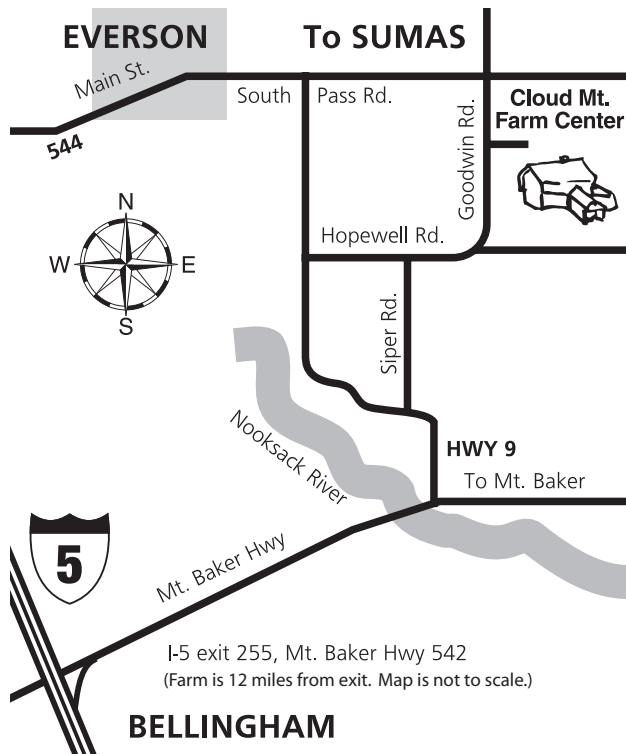

6906 Goodwin Road, Everson, WA 98247

Phone: (360) 966-5859

Fax: (360) 966-0921

E-mail: [info@cloudmountainfarmcenter.org](mailto:info@cloudmountainfarmcenter.org)

We are located along the western edge of the Cascade Mountain range in Northern Washington. Our 42 acres of nursery stock, vegetable fields and fruit orchards grow on the lower slopes of Sumas Mountain, and along the Nooksack River Valley.
